CORROSIONX® FOR GUNS

As a corrosion inhibitor, CorrosionX polar bonds to metal and prevents rust from starting, even with extended exposure to rain. CorrosionX for Guns withstands extreme handling abuse and repels moisture with the thinnest of coats.

Key Features

- Cuts through stubborn bore deposits for easier, more thorough cleaning
- Decreases fouling, even after thousands of rounds
- Lubricates and protects mechanisms and bores better and longer than products fortified with PTFE
- Ideal for semi-automatics and automatics
- Sticks to metal like a magnet to prevent rust
- Easy to apply- CorrosionX for Guns comes in a 4 oz. (113.4g) plastic bottle, with an applicator tip that's ideal for firearms
- Maximum protection and performance

Just like the metal they attach themselves to, molecules of CorrosionX for Guns are electrically charged. So, unlike ordinary cleaners, lubricants and protectants, CorrosionX for Guns sticks to metal – ferrous and non-ferrous – almost like a magnet.
