

LIFTMASTER WHEELIE BIN LIFTERS

**AUSTRALIAN-MADE
WASTE HANDLING
SOLUTIONS**

Manually lifting wheelie bins above shoulder height to empty into skip bins increases the risk of back or side strain and injury. Australian-made Liftmaster bin lifters can help reduce the risk of injury, by enabling a single user to lift up to 250kg wheelie bins with ease.

Liftmaster's range is compatible with a variety of wheelie bin sizes (80, 120, 140 and 240 litre capacities). They are available in powered or manual units, and full-swing or lift-and-tilt models – depending on your application.

TYPICAL APPLICATIONS:

ECOLIFT50	BLEH1500 & BLEH1800	UBL250HYD1500 & UBL250HYD1800
Local councils	Local councils	Supermarkets
