

EWELLIX

**NEW SMART
CAHB-2XS ACTUATOR**

Discover **Ewellix**'s latest innovation for mobile machinery applications. The CAHB-2xS actuator is a new smart version of the CAHB-2x family and part of the SmartX platform.

What is smart?

- Control - low current command, soft start and stop, and adjustable endstops.
- Sensor - true absolute position, current measurement, and temperature compensation.
- Monitoring and diagnostic - condition monitoring, parallel motion at full speed, and off-board diagnostic.
- Communication - plug and play CAN bus SAE J1939, command and feedback by CAN bus or Input/Output (I/O), and on-board and off-board diagnostic by CAN bus.

Why use a smart CAHB-2xS actuator?

- Lower cost - no external control unit and less cables.
- Quick time to market - flexibility in design and easy to install.
- More productivity - accurate motion and feedback, higher reliability.
