TIPS

This catalogue doesn't list every size. For a more comprehensive size listing please see our Radial Bearings Master List.

Items listed as "Special Material Only" are not available in standard chrome steel or 440C stainless. Please refer to the check boxes on the right of the item for material options.

Options listed as possible in Special Stainless Steel or Ceramic will not have the same seal type as the listed bearing. Stainless steel 316 usually have either PTFE or polyethylene seals. Ceramic bearings usually have either PTFE or nylon seals.

The Special Stainless column indicates that the size is available in a type of stainless steel that is not standard 440C grade. These special types include 304, 316, 17-4PH and special Anti Corrosion Bearing material.
