

**Power transmission couplings
Meet your specific requirements**

Heavy loads. Abrasive dust and dirt. Extreme temperatures and more. These conditions make it difficult, even dangerous for customers to maintain their machinery.

The global range of shaft couplings is so vast that the **SKF range** is focused on the ability to supply a coupling type that can satisfy nearly all applications in all types of industry.

The available range includes: Flex (Tyre) couplings, FRC couplings, Jaw couplings, Gear couplings, Grid couplings and Chain couplings.
