Castrol's extensive engine protection guide

Castrol as it should be. Evolved. Advanced. Accelerated.

Staying on top of our game

Castrol CEO, Michelle Jou, recently shared her thoughts that, “Castrol needs to listen to its customers, understand their evolving needs and aspirations, and... be a brand that inspires.”

Inspiration can come in many forms – a great idea, a pertinent insight, a groundbreaking achievement – and the concept of inspiring customers motivates us to be better for you. To that end, I’m proud to say that Castrol has never been more focused on listening to customers, driving innovation, and helping you accelerate your business forward. Our success will always be measured by your success.

Castrol has a long history in Australia – over 100 years in fact – and during that time we’ve worked hand in hand with our customers to ensure we’ve got the right insights, the right expertise and the right products.

With this ambition, our product portfolio continues to evolve, and nowhere is that more evident than within this, our latest Product Catalogue covering Castrol’s portfolio of advanced fluids and lubricants.

Whether it’s Castrol’s new Castrol ON range of EV fluids, the latest industry and OEM approvals on old favourites, or new products for new applications, the Castrol portfolio captured within this document is tailored to help your business succeed.

We hope you find the Product Catalogue of value and thank you for letting us be part of your company’s pathway to success.

Jane Carland,
Head of Country, ANZ

We know every part of a hybrid

The demand for hybrid technology is growing. By 2025, one in every four cars sold globally will be hybrid¹. Today, there is currently no industry standard specification for hybrid engine oils.

Introducing HYSPEC

HYSPEC is Castrol's new technical standard for engine oils for hybrids. It's not a new product, ingredient, or competitor comparison. It's a benchmark to measure the performance of our engine oils for hybrids.

The rigorous standard is made up of 15 industry tests relevant to hybrid operation, supplemented by Castrol bespoke tests.

HYSPEC is an industry first for hybrid vehicles to support workshops and their customers in identifying the right oil for their cars.

Challenges faced by hybrids

Hybrids operate differently from conventional cars. The switch between the internal combustion engine (ICE) and electric motor challenges oil in three key areas:

Contaminants – hybrid engines run at cooler temperatures, which can lead to water and fuel build-up in the oil. This can disrupt some oils and cause engine deterioration.

Engine intermittency – hybrid engines can operate at lower speeds, and then ramp up to high engine speeds quickly. Some oils can't keep up, resulting in reduced engine performance and protection.

System efficiency – cooler running and lower oil temperatures can lead to reduced engine efficiency and in turn, poorer fuel efficiency and charging of the battery.

HYSPEC enables Castrol to demonstrate how our engine oils for hybrids perform across these key areas.

Why Castrol?

- We have spent over 25 years researching, testing, and reporting on the characteristics of hybrids.
- We conducted a year-long road trial on mild, full, and plug-in hybrids that captured over two billion pieces of data. Combined, the cars travelled over 300,000 kms, for more than 7,000 hours – the equivalent to driving 24/7 for more than 42 weeks!
- To validate the findings, we commissioned a third-party consultancy and industry experts to conduct research with service centres, fleet operators and car owners to deliver a wider perspective on global markets.
- Castrol has worked with vehicle manufacturers to develop hybrid testing techniques – enabling them to constantly refine their products and improve performance.
- Motorsport is the ultimate testing ground for hybrid technology. Castrol is proud to work with the BWT Alpine Formula 1® Team and Ford M-Sport World Rally Championship team, testing our engine oils under the toughest conditions.

The benefits of HYSPEC

For strong resistance, protected switching and fuel economy², workshops and vehicle owners can choose oils that perform against HYSPEC – Castrol's new hybrid performance standard.

Our portfolio includes many hybrid-ready engine oils. Those badged with the HYSPEC logo demonstrate at least 25% benefit across the critical areas of contaminants, engine intermittency and system efficiency.

¹ As per IHS Markit predictions, 2021.

² As demonstrated in testing against HYSPEC, Castrol's hybrid performance standard. Strong resistance demonstrated by water and fuel contamination handling, protected switching by wear, stability and cold temperature testing, and fuel economy by industry standard fuel economy testing.

³ Compared to performance minimum requirements set in both industry specification and Castrol bespoke testing across tests applicable to hybrid vehicle types, covering contaminants, engine intermittency and system efficiency.

Your shortcut to easier ordering

Castrol EXPRESS online ordering boosts efficiency and is quick and easy to use - making your business easier to manage.

Setting up Castrol EXPRESS using our secure login portal is quick and easy! PLUS the app means you can order direct from your mobile or tablet.

Castrol EXPRESS gives you an instant overview of your account, orders, invoices and delivery status. **Benefits include:**

- Order products in just a few clicks.
- Repeat regular orders in under a minute.
- 24/7 delivery monitoring.
- Search and find products in seconds.
- Access to hazard, storage & technical info as you place your order.
- Review and search your orders.
- Review and search all invoicing.

Get Castrol EXPRESS today!

Please email: orders@castrol.com.au and include your business name, account number(s), contact name, business contact number and email address.

You can also register at: www.castrol.com/expressau

Please allow up to 24 hours for your user registration request to be completed.

Unlock the very edge of performance

EDGE 0W-20

(PLEASE REFER TO TRANSITION TABLE)

For over 15 years now, Castrol EDGE has been helping drivers unlock the very edge of performance, and the current generation of Castrol EDGE engine oils are no different.

Formulated with advanced full synthetic technology, Castrol EDGE products are tested to the highest standards to deliver the high-performance levels expected by drivers and by world-leading car manufacturers in their latest engine technology.

The ultimate test of performance, on the track Castrol EDGE products are pushed to the limit by some of the best in world motorsport including BWT Alpine F1 Team, Ford M-Sport, and in Supercars by the Tickford Racing.

Castrol EDGE 0W-20 is also proven to deliver against Castrol's HYSPEC standard. In doing so it is proven to demonstrate at least 25% benefit[^] across the three critical hybrid areas of contaminants, engine intermittency and system efficiency.

Choose Castrol EDGE and unlock the very edge of performance.

[^] Compared to performance minimum requirements set in both industry specification and Castrol bespoke testing across tests applicable to hybrid vehicle types, covering contaminants, engine intermittency and system efficiency.

FEATURES & BENEFITS

- Maximises short and long term engine performance
- Delivers unsurpassed levels of protection across a variety of driving conditions and temperatures
- Recommended by world-leading car manufacturers
- Protects the engine for the entire drain interval even under extreme pressure.

SPECIFICATION/TECHNICAL DATA

- API SP
- ILSAC GF-6

(PLEASE REFER TO TRANSITION TABLE)

For over 15 years now, Castrol EDGE has been helping drivers unlock the very edge of performance, and the current generation of Castrol EDGE engine oils are no different. Formulated with advanced full synthetic technology, Castrol EDGE products are tested to the highest standards to deliver the high-performance levels expected by drivers and by world-leading car manufacturers in their latest engine technology.

The ultimate test of performance, on the track Castrol EDGE products are pushed to the limit by some of the best in world motorsport including BWT Alpine F1 Team, Ford M-Sport, and in Supercars by the Tickford Racing.

Castrol EDGE 0W-40 A3/B4 is an advanced full synthetic engine oil that provides outstanding wear protection in performance engines, designed to run at their optimum level on lower viscosity oils, where the manufacturer recommends an ACEA A3/B4, API SN or earlier specification 0W-40 lubricant.

Choose Castrol EDGE and unlock the very edge of performance.

FEATURES & BENEFITS

- Maximises short and long term engine performance
- Delivers unsurpassed levels of protection across a variety of driving conditions and temperatures
- Recommended by world-leading car manufacturers.

SUITABLE FOR USE*:

- Audi
- Ford
- Holden
- Honda
- Lexus
- Mazda
- Mercedes-Benz
- Mitsubishi
- Nissan
- Porsche
- Skoda
- Subaru
- Toyota
- Volkswagen

Unlock the very edge of performance

EDGE 5W-30 LL

(PLEASE REFER TO TRANSITION TABLE)

For over 15 years now, Castrol EDGE has been helping drivers unlock the very edge of performance, and the current generation of Castrol EDGE engine oils are no different. Formulated with advanced full synthetic technology, Castrol EDGE products are tested to the highest standards to deliver the high-performance levels expected by drivers and by world-leading car manufacturers in their latest engine technology.

The ultimate test of performance, on the track Castrol EDGE products are pushed to the limit by some of the best in world motorsport including BWT Alpine F1 Team, Ford M-Sport, and in Supercars by the Tickford Racing.

Castrol EDGE 5W-30 LL is an advanced full synthetic engine oil approved for use in automotive petrol and diesel vehicles - including diesel vehicles equipped with a diesel particulate filter, where the manufacturer recommends an ACEA C3 specification 5W-30 lubricant.

Castrol EDGE 5W-30 LL is also proven to deliver against Castrol's HYSPEC standard. In doing so it is proven to demonstrate at least 25% benefit[^] across the three critical hybrid areas of contaminants, engine intermittency and system efficiency.

Choose Castrol EDGE and unlock the very edge of performance.

[^] Compared to performance minimum requirements set in both industry specification and Castrol bespoke testing across tests applicable to hybrid vehicle types, covering contaminants, engine intermittency and system efficiency.

FEATURES & BENEFITS

- Maximises short and long term engine performance
- Delivers unsurpassed levels of protection across a variety of driving conditions and temperatures
- Recommended by world-leading car manufacturers.

Unlock the very edge of performance

EDGE SUPERCAR 5W-50

(PLEASE REFER TO TRANSITION TABLE)

Castrol EDGE Supercar 5W-50 is an advanced full synthetic engine oil that has been developed with Ford to meet their WSS-M2C931-C oil specification as well as the API SN industry standard. These specs make Castrol EDGE Supercar 5W-50 the perfect choice for high horsepower vehicles, in particular Fords, requiring a SAE 5W-50 engine oil.

Initially developed for the iconic Ford GT, Castrol EDGE Supercar 5W-50 was rigorously tested and refined by both companies to unlock exhilarating performance from day one. As such every Ford GT supercar rolls off the production line first-filled with Castrol EDGE Supercar 5W-50. Castrol EDGE Supercar 5W-50 is also suitable for everyday high-performance vehicles from Ford's stables, such as the MY2020 High Performance 2.3L Mustang.

Castrol EDGE Supercar 5W-50 is tested and proven for increased strength, reduced friction and engine endurance, allowing it to perform in moments of intense pressure. It's unique Fluid TITANIUM transforms to be stronger under pressure and reduces friction – even under the intense pressures of today's supercar engines.

Castrol EDGE Supercar 5W-50 is suitable for use in automotive petrol vehicles where the manufacturer recommends an API SN or earlier specification 5W-50 lubricant.

FEATURES & BENEFITS

- Maximises short and long term engine performance
- Reduces engine deposits** to help maximise engine response
- Delivers outstanding levels of protection across a wide variety of driving conditions and temperatures
- Delivers very strong low foam performance
- Proven and tested in world leading Supercars.

SUITABLE FOR USE*:

- Ferrari
- Ford
- Lamborghini
- Maserati
- Porsche

SPECIFICATION/TECHNICAL DATA

- API SN
- Meets Ford WSS-M2C931-C

** Compared to the limit in the ASTM D 6593 Seq VG test

Unlock the very edge of performance

EDGE 5W-50 S

(PLEASE REFER TO TRANSITION TABLE)

For over 15 years now, Castrol EDGE has been helping drivers unlock the very edge of performance, and the current generation of Castrol EDGE engine oils are no different. Formulated with advanced full synthetic technology, Castrol EDGE products are tested to the highest standards to deliver the high-performance levels expected by drivers and by world-leading car manufacturers in their latest engine technology.

The ultimate test of performance, on the track Castrol EDGE products are pushed to the limit by some of the best in world motorsport including BWT Alpine F1 Team, Ford M-Sport, and in Supercars by the Tickford Racing.

Castrol EDGE 5W-50 S is suitable for petrol cars and designed to meet the latest specifications required by modern engines where the vehicle manufacturer recommends a Meets Ford WSS-M2C931-C or API SP 5W-50 lubricant. It has been developed for the FORD GT supercar and is also suitable for use in other performance cars.

Choose Castrol EDGE and unlock the very edge of performance.

FEATURES & BENEFITS

- Stronger under pressure in today's modern engine
- Independently tested at the highest standards
- Recommended for world-leading car manufacturers
- Protects the engine for the entire drain interval even under extreme pressure
- Proven performance across a variety of driving conditions and temperatures.

SPECIFICATION/TECHNICAL DATA

- API SP
- Meets Ford WSS-M2C931-C

As the first fill in all Ingenium Jaguar Land Rover petrol engines, Castrol EDGE PROFESSIONAL EC 0W-20 offers greater fuel economy* and Castrol EDGE PROFESSIONAL remains the only product exclusively recommended by Jaguar Land Rover.

- Maximises short and long term engine performance
- Reduces engine deposits to help maximise engine response
- Delivers complete protection across a variety of engine speeds, conditions and temperatures
- Sustains maximum performance even when under pressure
- Suitable for diesel engines fitted with DPF that allow fuel efficient oils
- Provides enhanced fuel efficiency.

SPECIFICATION/TECHNICAL DATA

- ACEA C5
- Jaguar Land Rover engine oil specification STJLR.03.5006, STJLR.51.5122

Unlock the very edge of performance

EDGE PROFESSIONAL E 0W-30

(PLEASE REFER TO TRANSITION TABLE)

For over 15 years now, Castrol EDGE has been helping drivers unlock the very edge of performance, and the current generation of Castrol EDGE engine oils are no different.

Formulated with advanced full synthetic technology, Castrol EDGE products are tested to the highest standards to deliver the high-performance levels expected by drivers and by world-leading car manufacturers in their latest engine technology.

The ultimate test of performance, on the track Castrol EDGE products are pushed to the limit by some of the best in world motorsport including BWT Alpine F1 Team, Ford M-Sport, and in Supercars by the Tickford Racing.

Choose Castrol EDGE and unlock the very edge of performance.

FEATURES & BENEFITS

- Maximises short and long term engine performance
- Reduces engine deposits to help maximise engine response
- Delivers complete protection across a variety of engine speeds, conditions and temperatures
- Sustains maximum performance even when under pressure
- Suitable for diesel engines fitted with DPF that allow fuel efficient oils
- Provides enhanced fuel efficiency.

Non-stop protection from every start

MAGNATEC 0W-20

(PLEASE REFER TO TRANSITION TABLE)

Castrol MAGNATEC engine oils are specifically engineered for today's urban driving environment and designed to protect engines against the wear caused by re-starting in busy traffic.

Castrol MAGNATEC clings like a magnet and locks to protect vulnerable metal surfaces and moving parts in your engine during warm-up, delivering superior protection from engine wear¹.

Castrol MAGNATEC 0W-20 is also proven to deliver against Castrol's HYSPEC standard. In doing so it is proven to demonstrate at least 25% benefit[^] across the three critical hybrid areas of contaminants, engine intermittency and system efficiency.

Castrol MAGNATEC. Non-stop protection from every start.

[^] Compared to performance minimum requirements set in both industry specification and Castrol bespoke testing across tests applicable to hybrid vehicle types, covering contaminants, engine intermittency and system efficiency.

¹ Tested versus the Sequence IVA API SN wear limit.

FEATURES & BENEFITS

- Clings to engine parts when the oil drains down
- Forms an extra layer that protects your engine during start up and beyond
- Bonds to metal surfaces to make engine parts more resistant to wear
- Provides increased protection in high and low temperature applications
- Provides continuous protection for all driving conditions, styles and temperatures.

SPECIFICATION/TECHNICAL DATA

- API SP
- ILSAC GF-6

Pack Size	5L	205L (from Mar '24)

MAGNATEC 0W-30 D

(PLEASE REFER TO TRANSITION TABLE)

Castrol MAGNATEC engine oils are specifically engineered for today's urban driving environment and designed to protect engines against the wear caused by re-starting in busy traffic.

Castrol MAGNATEC clings like a magnet and locks to protect vulnerable metal surfaces and moving parts in your engine during warm-up, delivering superior protection from engine wear¹.

Castrol MAGNATEC 0W-30 D is suitable for use in vehicles that require a 0W-30 lubricant that Meets Ford WSSM2C950- A specification.

Castrol MAGNATEC. Non-stop protection from every start.

¹ Tested versus the Sequence IVA API SN wear limit.

FEATURES & BENEFITS

- Clings to engine parts when the oil drains down
- Forms an extra layer that protects your engine during start up and beyond
- Bonds to metal surfaces to make engine parts more resistant to wear
- Provides increased protection in high and low temperature applications
- Provides continuous protection for all driving conditions, styles and temperatures.

MAGNATEC HYBRID 0W-16

Other oils have to reach a minimum temperature before they provide full engine protection performance. The engines in Hybrid and Stop Start Technology vehicles can run up to 40 degrees cooler* than the engines in conventional cars because the repeated engine shut downs restrict the rise in engine temperature.

Castrol MAGNATEC's intelligent molecules cling to the engine like a magnet providing an extra layer of protection. In addition, fully-synthetic base oil is used to improve oil flow at low temperatures. Therefore, Castrol MAGNATEC Hybrid's formulation dramatically reduces** engine wear for protection even while driving when the oil temperature is low. Now with ultra-refined molecules, for instant protection from the moment you start.

Castrol MAGNATEC HYBRID 0W-16 is also proven to deliver against Castrol's HYSPEC standard. In doing so it is proven to demonstrate at least 25% benefit^ across the three critical hybrid areas of contaminants, engine intermittency and system efficiency.

Castrol MAGNATEC. Non-stop protection from every start.

* Proven by internal tests.

** As tested in the industry Sequence IVA test¹ Tested versus the Sequence IVA API SN wear limit.

^ Compared to performance minimum requirements set in both industry specification and Castrol bespoke testing across tests applicable to hybrid vehicle types, covering contaminants, engine intermittency and system efficiency.

FEATURES & BENEFITS

Castrol MAGNATEC Hybrid 0W-16 contains intelligent molecules which:

- Cling to critical engine parts when the oil drains down
- Cling to your engine forming an extra layer that protects during start up and beyond
- Bond to metal surfaces to make engine parts more resistant to wear
- Are combined with synthetic technology to provide increased protection in high and low temperature applications
- Provide continuous protection for all driving conditions, styles and temperatures
- Deliver superior performance under stop-start mode operation.

MAGNATEC SUV 5W-30 C3

(PLEASE REFER TO TRANSITION TABLE)

Unlike many cars, your SUV does everything - from short trips dropping the children off in town, to long distance journeys carrying heavy luggage, even towing a trailer when needed - all of this across a variety of terrain.

These different tasks all place different demands on the engine:

- Short trips - no chance to warm-up fully
- Urban driving - stop-start wear
- Towing and heavy loads - high load, high temperatures.

That's why we developed Castrol MAGNATEC SUV, the oil that does everything too!

Castrol MAGNATEC SUV - non-stop SUV protection from every start.

FEATURES & BENEFITS

Castrol MAGNATEC SUV 5W-30 C3 has intelligent molecules that:

- Cling to the engine like a magnet providing an extra layer of protection
- Deliver dramatically better protection from warm-up¹
- Up to 25% better stop-start² wear protection
- Up to 25% better heavy load wear³ protection.

1. Tested vs the Sequence IVA API SN wear limit.
2. Tested vs the CEC OM646LA wear limits.
3. Tested vs the Sequence IIIG API SN wear limit.

MAGNATEC DIESEL DX 5W-40

Castrol MAGNATEC DIESEL DX 5W-40, DPF compatible technology with intelligent molecules for an extra layer of protection, reducing wear during the critical warm-up period. Its unique formulation protects from the moment you start, dramatically reducing* engine wear. Now with ultra-refined molecules, for protection you can see, hear and feel.

FEATURES & BENEFITS

FULL SYNTHETIC Castrol MAGNATEC DIESEL DX 5W-40 contains intelligent molecules that:

- Maintains engine efficiency and responsiveness through dedicated DPF compatible technology
- Provide excellent soot handling performance thus minimising oil thickening
- Provide superior performance under extreme cold start-up conditions compared to thicker grades
- Castrol MAGNATEC DIESEL DX 5W-40 has been specially formulated to deliver outstanding protection for the latest engines fitted with after treatment devices such as Diesel Particulate Filters and 3-way catalysis.

Helps extend engine life

GTX 5W-30 RN17

Castrol GTX is one of the world's most trusted engine oils. The modern world creates difficult challenges for engines.

Poor fuel quality, heat and frequent short trips can all lead to sludge that potentially shortens engine life. Sludge is a sticky deposit that can block your engine's vital oilways and if untreated it can rob an engine of power and, ultimately, its life.

Castrol GTX with 3X CLEAN formula works to Catch - Control - Clean dirt from engine oilways, keeping your engine cleaner for longer and helping to extend engine life.

Castrol GTX also protects against new sludge formation better than tough industry standards*.

Help extend the life of your engine with Castrol GTX.

FEATURES & BENEFITS

- Superior cleaning of engine sludge caused by poor fuel quality, heat and frequent short trips
- Advanced protection against viscosity and thermal breakdown
- Premium quality base oils and anti wear additives to help extend the life of your engine
- Helps minimise oil consumption.

GTX ULTRACLEAN 10W-30

BECOMES GTX 10W-30 IN 2024

Castrol GTX is one of the world's most trusted engine oils. The modern world creates difficult challenges for engines. Poor fuel quality, heat and tough driving conditions can all lead to sludge that potentially shortens engine life. Sludge is a sticky deposit that builds up in an engine's vital oil-ways and it can prevent oil from protecting the engine.

Castrol GTX ULTRACLEAN's synthetic technology has superior performance. Its Double Action formula cleans away old sludge, and protects against new sludge formation, giving you more control over today's challenging conditions. Help extend the life of your engine with Castrol GTX ULTRACLEAN.

FEATURES & BENEFITS

Castrol GTX ULTRACLEAN 10W-30 with Synthetic Technology:

- Provides 50% superior sludge protection compared to tough industry standards*
- Advanced protection against viscosity and thermal breakdown
- Superior protection against high temperature deposits
- Premium quality base oils and anti-wear additives that extend the life of your engine.

Poor fuel quality, heat and frequent short trips can all lead to sludge that potentially shortens engine life. Sludge is a sticky deposit that can block your engine's vital oilways and if untreated it can rob an engine of power and, ultimately, its life.

Castrol GTX with 3X CLEAN formula works to Catch, Control and Clean dirt from engine oilways, keeping your engine cleaner for longer and helping to extend engine life.

Castrol GTX also protects against new sludge formation better than tough industry standards*. Help extend the life of your engine with Castrol GTX.

* Vs API SP Limits

FEATURES & BENEFITS

- Superior cleaning of engine sludge* caused by poor fuel quality, heat, and frequent short trips
- Advanced protection against viscosity and thermal breakdown
- Premium quality base oils and anti-wear additives to help extend the life of your engine
- Helps minimise oil consumption.

Helps extend engine life

GTX DIESEL 15W-40

Castrol GTX is one of the world's most trusted engine oils. It's more than just oil. It's liquid engineering that provides extra protection against diesel engine problems, like soot and harsh deposits that your engine faces every day. Why is this important? Because soot and harsh deposits can make your oil thicker, block oil ways, cause wear and decrease performance.

Help extend the life of your engine with Castrol GTX DIESEL.

FEATURES & BENEFITS

- Provides superior cleaning power to maintain engine performance
- Reduces the build-up of harsh deposits
- Helps prevent oil from thickening to keep it flowing freely
- Outstanding diesel engines wear protection
- Suitable for inter-cooled, turbo-charged diesel engines.

SPECIFICATION/TECHNICAL DATA

- API CH-4/SJ
- NOT recommended for vehicles fitted with Diesel Particulate Filters or petrol engines with catalytic converters

Helps extend engine life

GTX HIGH MILEAGE 15W-50

Castrol GTX is one of the world's most trusted engine oils. It's more than just oil. It's liquid engineering that protects against high mileage problems, like smoke and leaks that your engine faces every day.

As engines age, seals can become brittle, allowing oil to leak through your engine, increasing oil consumption. Help extend the life of your high mileage engine with Castrol GTX HIGH MILEAGE.

FEATURES & BENEFITS

- Engineered to protect against smoke and leaks
- Helps control oil consumption
- Seal friendly formulation preserves elasticity of engine seals
- Outstanding protection against engine wear
- Suitable for engines with over 100,000 kms.

GTX PROFESSIONAL 10W-30

BECOMES GTX 10W-30 IN 2024

Castrol GTX PROFESSIONAL is one of the world's most trusted motor oils. It's more than just oil. It's liquid engineering that protects against problems, like sludge, that your engine faces every day.

Severe driving conditions such as every day stop-and-go/stop-start traffic, harsh weather conditions and extended drain intervals, can all cause the build-up of a thick, tar-like substance called sludge. You can't see this sludge build-up but it can damage your engine's performance and cause premature engine failure.

Protect your car from harmful sludge build-up with Castrol GTX PROFESSIONAL.

FEATURES & BENEFITS

- Contains anti-sludge formula that provides superior sludge protection compared to tough industry standards
- Provides superior protection against viscosity and thermal breakdown
- Features anti-wear additives that extend the life of your engine.

Helps extend engine life

GTX PROFESSIONAL 15W-40

BECOMES GTX 15W-40 IN 2024

Castrol GTX PROFESSIONAL 15W-40 provides advanced engine protection and is suitable for a wide range of passenger car, SUV and light commercial vehicle petrol engines. Castrol GTX PROFESSIONAL 15W-40 is also suitable in many diesel engines of both passenger cars and light commercial vehicles.

Castrol GTX PROFESSIONAL 15W-40 with Synthetic Technology is your guarantee of professional quality.

Castrol GTX PROFESSIONAL – outstanding sludge protection.

FEATURES & BENEFITS

- Superior engine protection under all driving conditions
- Rapid, even flow at start-up for smoother idling
- High thermal stability minimises engine deposits
- Highly effective detergent and dispersant system to keep engine internals clean
- Suitable for a wide range of petrol and diesel passenger cars and light commercial vehicles
- Outstanding oil consumption control
- Viscosity range that can be used in many new and older model vehicles.

Commercial Vehicle Engine oils

VECTON FUEL SAVER 5W-30 E6/E9

A full synthetic low SAPS engine oil delivering up to 40% better performance (than API and ACEA industry standards) in the latest European diesel engines including Euro VI and engines fitted with DPF.

It also gave up to 1% fuel saving* in a Euro V engine using the European Transient Cycle test when compared to a modern top tier 15W-40 engine oil.

FEATURES & BENEFITS

Designed for better fuel economy in the latest Euro VI diesel engines. Also suitable for extended service intervals as recommended by many European engine manufacturers, including Mercedes-Benz, and Volvo, and is approved for use in MAN Euro VI engines. It can be used in low emission Euro IV & Euro V European trucks and buses, especially those requiring a low SAPS lubricant and in older on-road and off-road vehicles and equipment that require this performance level.

- Delivers real world fuel savings without compromising engine protection
- Fights wear to critical engine components even at low viscosity
- Fights piston deposits helping to reduce oil consumption
- Fights harmful acids which form during engine operation
- Maintains the efficiency of exhaust after-treatment systems ensuring continued compliance with emissions legislation.

VECTON LONG DRAIN 15W-40 CK-4/E9

Castrol VECTON® LONG DRAIN 15W-40 CK-4/E9 is an advanced part synthetic heavy duty diesel engine oil that is specifically engineered to deliver longer useful oil life. It is suitable for use in high speed 4-stroke diesel engines and is compatible with diesel engines fitted with an EGR. It is also compatible with the latest exhaust after treatment systems such as; DPF, DOC and/or SCR.

FEATURES & BENEFITS

Castrol VECTON® Long Drain 15W-40 CK-4/E9 with System Pro Technology™ is specifically engineered and tested for extended drains up to 80,000 kms*. Castrol VECTON Long Drain System Pro Technology™ has an extra performance reserve that fights oil breakdown by:

- Combating oxidation and deposits
- Neutralising harmful acids
- Controlling oil aeration
- Also adapting to increased temperatures while resisting viscosity loss through shear.

All of this means longer useful oil life, giving you the confidence in your maximum drain interval.

Oil drain intervals vary based on factors such as engine type, duty cycle and fuel burn. Consult service manuals for recommended oil drain intervals. Extended drains may be possible if done in conjunction with Castrol's Used Oil Analysis (UOA) program and in consultation with Castrol's Technical Services team.

* Compared to API and ACEA industry requirements and based on tests conducted on 81% of the Castrol VECTON range by volume using 12 months sales up to March 2017.

VECTON LONG DRAIN 10W-40 E7

A heavy duty diesel engine oil designed to allow fleet operators to run their Scania vehicles to maximum oil drain[^] intervals.

Its primary application is for the latest low emission Euro 4 and Euro 5 Scania trucks and buses; Castrol VECTON LONG DRAIN 10W-40 E7 is also suitable for use in any vehicle requiring the ACEA E7 level of performance.

Castrol VECTON LONG DRAIN 10W-40 E7 provides exceptional resistance to soot loading, and delivers outstanding performance when you run extended drains, even under severe operating conditions.

FEATURES & BENEFITS

- Maximum oil drain intervals to keep vehicles on the road for longer. Scania have approved Castrol VECTON LONG DRAIN 10W-40 E7 for use at extended oil drain intervals in their latest diesel engines
- Engine protection, even when soot and other contaminants are present. It protects against all types of engine wear, deposit build-up and bore-polishing. Its advanced formulation continues to protect even under the most severe conditions, extending engine life and preventing unscheduled downtime.

[^]An extended drain interval programme should be undertaken in conjunction with Castrol Technical Service, who can assist with oil sampling frequency and interpretation of oil analysis results. Engage your OEM to understand your equipment's extended drain capability prior to commencing any long drain program.

VECTON 15W-40 CK-4/E9

Castrol VECTON® 15W-40 CK-4/E9 is an advanced heavy duty diesel engine oil, specifically engineered with synthetic technology to deliver longer useful oil life. It is suitable for use in high speed 4-stroke diesel engines with diesel fuels of up to 500ppm sulphur and is compatible with diesel engines fitted with exhaust gas recirculation (EGR) systems. It is also compatible with the latest exhaust after treatment systems such as DPF, DOC and/or SCR when diesel sulphur is limited to 15ppm max.

FEATURES & BENEFITS

Castrol VECTON with System Pro Technology™ delivers up to 45% extra performance reserve* for longer useful oil life, giving you confidence in your maximum drain interval. All Castrol VECTON products are certified CO2 neutral according to the internationally applicable PAS2060 standard.

Modern trucks use new technologies to make as much as 30% higher torque, but that also brings higher engine temperatures and pressures. This punishes the oil, pushing it closer to breakdown, reducing its useful life. Castrol VECTON's System Pro Technology™ formulated with extra performance reserve fights oil breakdown by:

- Controlling oxidation and deposits
- Neutralising harmful acids
- Maintaining viscosity.

System Pro Technology™ also adapts to increased temperatures resisting viscosity loss through thermal and mechanical shear. All of this means longer useful oil life giving you the confidence in your maximum drain interval.

RX DIESEL 15W-40 CI-4/E7

Castrol RX DIESEL 15W-40 CI-4/E7 is a multi-purpose, heavy duty diesel engine oil. It is suitable for use in high speed 4-stroke diesel engines that use a broad range of fuel qualities. It is also compatible with diesel engines fitted with exhaust gas recirculation (EGR) systems.

FEATURES & BENEFITS

- Contains cleaning agents which displace particles that may otherwise build up on your engine surfaces reducing deposits
- Contains anti-oxidants which disrupt the chemical reactions that can lead to oil thickening
- Provides effective piston deposit control and maintains its viscosity to encourage long and healthy engine life.

RX DIESEL 15W-40 CI-4 PLUS/E7

Castrol RX DIESEL 15W-40 CI-4 Plus/E7 is a multi-purpose, heavy duty diesel engine oil. It is suitable for use in high speed 4-stroke diesel engines that use a broad range of fuel qualities. It is also compatible with diesel engines fitted with exhaust gas recirculation (EGR) systems.

Recommended by Castrol for use in all naturally aspirated and turbocharged diesel engines fitted in trucks, tractors, buses, LCV's and off-highway equipment, agricultural and fixed plant machinery without DPF/DPD exhaust after-treatment devices.

FEATURES & BENEFITS

During its working life, your engine faces challenges from combustion by-products that can form deposits, and thicken the oil. Castrol RX DIESEL 15W-40 CI-4 Plus/E7 combats these issues in two ways:

- Contains cleaning agents which displace particles that may otherwise build up on your engine surfaces reducing deposits
- Contains anti-oxidants which disrupt the chemical reactions that can lead to oil thickening.

Castrol RX DIESEL 15W-40 CI-4 Plus/E7 provides effective piston deposit control and maintains its viscosity to encourage long and healthy engine life.

RX SUPER 15W-40 CJ-4/E9

Castrol RX SUPER 15W-40 CJ-4/E9 is an advanced, heavy duty diesel engine oil. It is suitable for use in high speed 4- stroke diesel engines that use a broad range of fuel qualities. It is compatible with diesel engines fitted with EGR and the latest exhaust after treatment systems such as; DPF, DOC and/or SCR.

Recommended for use in all naturally aspirated and turbocharged diesel engines fitted in trucks, tractors, buses, LCV's and off-highway equipment, agricultural and fixed plant machinery.

FEATURES & BENEFITS

New and advanced Castrol RX SUPER 15W-40 CJ-4/E9 with specially engineered DuraShield™ Boosters delivers 40% better wear protection*.

One of the main causes of damage in modern engines is abrasive wear. Castrol RX SUPER 15W-40 CJ-4/E9 with DuraShield™ Boosters is proven in industry testing to provide protection to your engine in two ways:

- Under severe engine operating conditions soot can agglomerate to form large particles which displace oil on moving metal surfaces. This results in metal to metal contact. Castrol RX SUPER 15W-40 CJ-4/E9 with DuraShield™ Boosters helps to prevent the agglomeration of soot as well as protecting surfaces from wear
- Castrol RX SUPER 15W-40 CJ-4/E9 with DuraShield™ Boosters provides a protective layer on the moving metal surfaces which resists break down even under difficult conditions.

CRB MINING 15W-40 CK-4

Castrol CRB Mining 15W-40 CK-4 is a low SAPS SAE 15W-40 advanced heavy duty engine oil suitable for use in diesel engines where API CK-4 or CJ-4 and below is required. Castrol CRB Mining 15W-40 CK-4 offers better performance and protection for all existing heavy duty equipment and ensures that hardware performs to full potential.

FEATURES & BENEFITS

Castrol CRB Mining 15W-40 CK-4 is recommended for most heavy duty, four stroke diesel engines from US manufacturers to ADR 80/03 and earlier specifications. Also, the product can be used where low ash oils are recommended or preferred by engine manufacturers. Suits most applications where Diesel Particulate Filters (DPF), Diesel Particulate Diffusers (DPD), or similar devices are fitted.

CRB RAIL 20W-40

Castrol CRB Rail 20W-40 is a multigrade premium diesel engine oil formulated with highly refined base oils and the latest additive system for providing superior protection in General Motors (EMD) and General Electric (GE) latest generation railroad diesel engines.

Castrol CRB Rail 20W-40 is formulated to meet LMAO Generation 6 engine oil requirements. When used in conjunction with a quality used oil trend analysis program and OEM's maintenance instructions, locomotive engine models operating in moderate service may be capable of extended protection up to 6 months, 184 days (maximum).

FEATURES & BENEFITS

The advanced formulation of Castrol CRB Rail 20W-40 provides enhanced protection and cleanliness for a more reliable engine, giving long and healthy engine life.

Product benefits include:

- High detergency assuring engine cleanliness
- Extended protection enabling a long service life - up to 184 day drain intervals*
- Good sludge resistance and filter performance
- Potential for lower oil consumption vs monograde oils.

* When used in conjunction with a quality used oil trend analysis program and OEM's maintenance instructions, locomotive engine models operating in moderate service may be capable of extended protection up to 6 months, 184 days (maximum).

CRB RAIL 20W-40 LS

Castrol CRB Rail 20W-40 LS is a multigrade premium diesel engine oil formulated with highly refined base oils, formulated without zinc and phosphorus, featuring the latest additive system for providing superior protection in Progress Rail (EMD) and Webtec (GE) latest generation railroad diesel engines.

Castrol CRB Rail 20W-40 LS is formulated to meet LMAO Generation 7 engine oil requirements.

When used in conjunction with a quality condition-based monitoring program and OEM's maintenance instructions, locomotive engine models operating in moderate service may be capable of extended protection past the 184 days achieved with a LMAO Generation 6 engine oil. LMOA GEN 7 RREO formulations effectively address the increased stress factors of locomotive engines equipped with EGR (Tier 4) to align with established maintenance conditions. Also compatible with older locomotives and potential to improve operating efficiencies.

FEATURES & BENEFITS

The advanced formulation of Castrol CRB Rail 20W-40 LS provides enhanced protection and cleanliness for a more reliable engine, giving long and healthy engine life.

Product benefits include:

- Lower oil consumption
- Ability to move from set drain intervals to condition based monitoring
- Compatible with older locomotives and potential to improve operating efficiencies
- High detergency assuring engine cleanliness
- Extended protection enabling a long service life
- Good sludge resistance and filter performance
- Potential for lower oil consumption vs monograde oils.

TRANSMAX AGRI AS TRANS PLUS 20W-30

(PLEASE REFER TO TRANSITION TABLE)

Castrol TRANSMAX Agri AS Trans Plus 20W-30 is a universal, wet brake transmission/hydraulic fluid designed to satisfy the various requirements of most tractor and farm machinery manufacturers. The AS (anti-squawk) characteristics of the formulation help to minimise the effect of wet brake chatter.

FEATURES & BENEFITS

- One oil reduces inventory, saves money
- One oil simplifies servicing, avoids misapplication
- Formulated to minimise wet brake chatter, improves brake efficiency
- SAE 20W-30 viscosity rating, ideally suited to the majority of Australian farming regions
- Provides outstanding gear wear protection and bearing durability extending component life.

SPECIFICATION/TECHNICAL DATA

- SAE 20W-30, 80W-85
- API Gear: GL-4
- Massey Ferguson: M1135
- Ford ESN-M2C-86B
- New Holland NH420

TRANSMAX AGRI MP PLUS 20W-40

Castrol TRANSMAX Agri MP Plus 20W-40 is a multi-purpose oil suitable for use in a wide range of applications on the farm. It has been developed specifically to deliver performance and protection for engines, transmissions, wet brakes, hydraulics and front axles.

FEATURES & BENEFITS

- One oil simplifies servicing, avoids misapplication
- One oil reduces inventory, saves money
- Improved wear protection in latest generation diesel engines
- Enhanced soot handling performance.

SPECIFICATION/TECHNICAL DATA

- API GL-4
- API CE/SF

Pack Size	20L	205L
Item Code	3430997	3430996
Barcode	9310084034534	9310084034541

TRANSMAX AGRI TRANS PLUS 80W

(PLEASE REFER TO TRANSITION TABLE)

Castrol TRANSMAX Agri Trans Plus 80W can be used in hydraulic, transmission and PTO of tractors and off-highway equipment. It gives high levels of wear prevention from start up and throughout the operative period with enhanced corrosion protection properties.

Castrol TRANSMAX Agri Trans Plus 80W is also suitable for hydraulic/transmission systems which require SAE 10W-30 lubricant.

FEATURES & BENEFITS

- Outstanding gear wear protection and bearing durability to extend component life
- SAE 10W-30 viscosity rating which is beneficial for cold start-up hydraulic performance
- Suitable for separate hydraulic systems where SAE 15W, 20W or 10W-30 fluids are specified, this allows for product rationalisation and inventory opportunities.

SPECIFICATION/TECHNICAL DATA

- API GL-4
- MF - M1145
- Volvo Transmission Oil 97303:053 (WB 101)
- ZF TE-ML 03E, 05F, 17E, 21F
- Meets Ford ESN-M2C-134D, JD 20C, Valtra G2-08
- Suitable for use where Case 1207, Case 1209, MAT 3505, MAT 3525, MAT 3540, NH410B or Ford M2C86-B are specified.
- Suitable for use in S-Matic CVT and RC-shift transmissions
- TRANSMAX Agri Trans Plus 80W is registered under the following ZF approval numbers: ZF002188, ZF002189, ZF002190, ZF002191F.

AUTOMATIC TRANSMISSION FLUIDS

TRANSMAX ATF HEAVY DUTY

Castrol Transmax ATF Heavy Duty is an Automatic Transmission Fluid designed for heavy duty applications. It is approved against Allison TES 389 and is suitable for use in all Allison Heavy Duty Automatic Transmissions.

FEATURES & BENEFITS

- Formulated to provide optimized seal compatibility meeting Allison TES 389 requirements.

SPECIFICATION/TECHNICAL DATA

- Allison TES 389
- Dexron®-IIIH
- Volvo Transmission Oil 97341: 033
- Volvo 97340
- Meets Ford Mercon®

TRANSMAX ATF DEX/MERC MULTIVEHICLE

(PLEASE REFER TO TRANSITION TABLE)

Castrol TRANSMAX ATF Dex/Merc Multivehicle is recommended for use in GM and Ford vehicles requiring Dexron III or Mercon fluids and the automatic transmissions of a wide range of Japanese cars, light commercial vehicles, and SUVs. Additionally, it is suitable for use in most European passenger cars requiring a Dexron III/Mercon fluid.

FEATURES & BENEFITS

- Enhanced friction durability prolongs transmission life and promotes smooth shifting
- Increased resistance to oil oxidation and degradation
- Increased clutch band and clutch pack capacity
- Improved protection of copper and bronze components.

SPECIFICATION/TECHNICAL DATA

- Allison TES 389
- Meets Dexron®-IIIH, Mercon®
- Suitable for use where JASO 1A(03)
- JASO 1A LV(13) is required including:
- Toyota T III, T IV, WS
- Mitsubishi SP II, IIM, III, IV, PA, J3
- Mazda ATF M-III, M-V, FZ
- Honda/Acura DW 1/Z 1
- Nissan Matic D, J, S

AUTOMATIC TRANSMISSION FLUIDS

TRANSMAX POWER STEERING FLUID

(PLEASE REFER TO TRANSITION TABLE)

Castrol TRANSMAX Power Steering Fluid may be used in power steering units of many types of vehicles where DEXRON®-IIIH, DEXRON®-IID, MERCON®, or JASO-1A type performance is required.

FEATURES & BENEFITS

- Efficient operation of power steering units in all conditions.

SPECIFICATION/TECHNICAL DATA

- Meets - Ford MERCON®, GMDEXRON® -IIIH
- Meets DEXRON® -IIIH, MERCON®
- Suitable for use where JASO 1A(03)
- JASO 1A LV(13) is required.

Pack Size	6 x 500ML
Item Code	3429283

NEW LABEL COMING SOON

TRANSMAX OFFROAD 10W

Castrol Transmax Offroad 10W is designed for use in powershift transmissions, direct drive transmissions, wet disc brakes, final drives and differentials in off road machinery where Caterpillar TO-4 is required. It is approved against ZF TE ML 03C and is recommended for use in Komatsu off road machinery drivetrain and hydraulics.

FEATURES & BENEFITS

- Good oxidation stability maintains high temperature performance and transmission cleanliness during service life
- Stable friction characteristics eliminate slippage and reduce brake noise
- Excellent friction performance with a wide range of friction materials ensures smooth positive changes and enhanced friction material durability
- Improved wear performance extends component life.

SPECIFICATION/TECHNICAL DATA

- Approved - ZF TE-ML 03C
- Meets - CAT TO-4
- Recommended for use in Komatsu Equipment
- Castrol Transmax Offroad 10W is registered under the following ZF approval numbers: ZF004914

Pack Size	20L	205L	1000L	Bulk
Item Code	3427753	3427754	3427751	3427756

TRANSMAX OFFROAD 30

Castrol Transmax OFFROAD 30 is designed for use in powershift transmissions, direct drive transmissions, wet disc brakes, final drives and differentials in off road machinery where Caterpillar TO-4 is required. This product is also approved for use where ZF TE ML 03C and 07F are required and recommended for use in Komatsu off-road machinery drivetrain and hydraulics as well as the now obsolete Allison C-4 applications.

FEATURES & BENEFITS

- Excellent oxidation stability maintains high temperature performance and transmission cleanliness during service life
- Stable friction characteristics eliminate slippage and reduce brake noise
- Excellent friction performance with a wide range of friction materials ensures smooth positive changes and enhanced friction material durability
- Improved wear performance extends component life.

SPECIFICATION/TECHNICAL DATA

- ZF TE-ML 03C, 07F
- Meets CAT TO-4
- Recommended for use in Komatsu Equipment
- Recommended for use where Allison C4 is required
- Transmax Offroad 30 is registered under the following ZF approval numbers:
ZF004897

Pack Size	20L	205L	1000L	Bulk
Item Code	3427810	3427811	3427809	3426466

TRANSMAX OFFROAD 50

Castrol Transmax Offroad 50 is designed for use in powershift transmissions, direct drive transmissions, wet disc brakes, final drives and differentials in off road machinery where Caterpillar TO-4 is required, and recommended for use in Komatsu off-road machinery drivetrain and hydraulics. It is also suited to severe operating conditions such as mining.

FEATURES & BENEFITS

- Excellent oxidation stability maintains high temperature performance and transmission cleanliness during service life
- Stable friction characteristics eliminate slippage and reduce brake noise
- Excellent friction performance with a wide range of friction materials ensures smooth positive changes and enhanced friction material durability
- Improved wear performance extends component life
- Suitable for mining and off-highway applications.

SPECIFICATION/TECHNICAL DATA

- Meets CAT TO-4
- Recommended for use in Komatsu Equipment

AUTOMATIC TRANSMISSION FLUIDS

TRANSMAX OFFROAD 60

Castrol Transmax Offroad 60 is a transmission lubricant using highly refined mineral oil, designed for use in powershift transmissions, direct drive transmissions, wet disc brakes, final drives and differentials in off road machinery. It is also suited to severe operating conditions such as mining.

FEATURES & BENEFITS

- Excellent oxidation stability maintains high temperature performance and transmission cleanliness during service life
- Stable friction characteristics eliminate slippage and reduce brake noise
- Excellent friction performance with a wide range of friction materials ensures smooth positive changes and enhanced friction material durability
- Improved wear performance extends component life
- Suitable for mining and Off-Highway applications.

SPECIFICATION/TECHNICAL DATA

- Suitable for use where: CAT TO-4 is required.

Item Code	3427669	3430977	3430978
Barcode	9310084033094	9310084033070	

TRANSMAX CVT

Fully synthetic fluid recommended for use in push belt continuous variable transmissions (CVT) of most Japanese passenger cars.

FEATURES & BENEFITS

- Exceptional steel on steel friction durability maintains transmission performance
- Good gear wear protection prolongs the performance and life of the transmission
- High shear stability and enhanced antifoaming and air release characteristics maintain effective lubrication.

SPECIFICATION/TECHNICAL DATA

- For most Japanese cars with CVT
- Also Hyundai, Kia, Chrysler, Mini, Ford, Mercedes Benz

Pack Size	20L
Item Code	3425325
Barcode	9310084032516

* Refer to the PDS for the full list of specifications

TRANSMAX ATF DEXRON®-VI MERCON® LV MULTIVEHICLE

(PLEASE REFER TO TRANSITION TABLE)

Castrol TRANSMAX ATF DEXRON®-VI MERCON® LV Multivehicle, formulated with Smooth Drive Technology™, is a Full Synthetic Technology formulation designed for modern automatic transmissions. Its superior technology enables longer transmission life. Castrol TRANSMAX ATF DEXRON®- VI MERCON® LV Multivehicle is approved and licensed by GM and Ford for use in vehicles requiring their latest ATF specifications and also exceeds the requirements of the JASO-1A for use in most Asian automatic transmissions.

Castrol TRANSMAX ATF DEXRON®-VI MERCON® LV Multivehicle is also suitable for use in the majority of 6,7,8 and 9 speed automatics of European cars. It delivers enhanced protection and a smoother drive for longer..

FEATURES & BENEFITS

- OEM approved and licensed by Ford (MERCON®LV) and GM (DEXRON®-VI)
- Low viscosity formula for maximum fuel efficiency in modern automatic transmissions
- Enhanced friction durability for smooth transmission performance
- Superior high temperature protection to effectively resist oxidation.

SPECIFICATION/TECHNICAL DATA

- Ford MERCON® LV
- GMDEXRON® -VI
- Suitable for use where JASO 1A(03)
- JASO 1A LV(13) is required including:
 - Toyota T III, T IV, WS
 - Mitsubishi SP II, IIM, III, IV
 - PA, J3
 - Mazda ATF M-III, M-V, FZ
 - Honda/Acura DW 1/Z 1
 - Nissan Matic D, J, S
- JWS 3314/3317/3309
- Suzuki AT Oil 5D06, 2384KIsuzu
- Subaru F6, Red 1
- Daihatsu AMMIX ATF D-III
- Multi D3-SP
- Hyundai/Kia SP III, SP IV
- Also suitable for use in 6-speed automatics from Audi BMW, Mini-Cooper, Jaguar, Peugeot/Citroen, Saab, Volvo, VW, Porsche and all vehicles where Dexron III or Mercon SP is required.

Pack Size	6 x 1L	3 x 4L	20L	60L	205L

* Refer to the PDS for the full list of specifications

TRANSMAX DUAL

Full synthetic transmission fluid developed for the latest Dual Clutch transmission technology.

FEATURES & BENEFITS

- Excellent synchroniser and clutch performance due to balanced frictional characteristics
- Excellent thermal and oxidation stability
- Exceptional cold flow properties
- Operating temperature reduction through reduced friction
- Very good extreme pressure (EP) anti-pitting behaviour
- High shear resistance – constant viscosity during oil life
- Good seal compatibility.

SPECIFICATION/TECHNICAL DATA

- Meets Ford WSS-M2C-936-A (Dual Clutch), VW G 052 529 (Audi 6 speed only), Volvo (1161838&9), Chrysler (Europe), Mitsubishi
- Castrol's recommendation for VW, Seat, Skoda 6-speed DSG Transmission (DQ250)

Pack Size	20L
Item Code	3380380
Barcode	9310084022050

TRANSMAX MERCON® V

An automatic transmission fluid specifically designed to provide extended protection for the transmission of the latest Ford 5 speed transmission requiring a MERCON® V specification. May be used in power steering for the majority of cars, light commercial vehicles and tractors except where specialist fluids are recommended.

FEATURES & BENEFITS

- Outstanding anti-wear protection for reduced wear on gears, bushes and bearings
- Increased resistance to oil oxidation and degradation
- Excellent high temperature stability and performance
- Exceptional low temperature fluidity for smoother winter cold-start shifts, improved performance on vehicles operated in 'snow' country
- Friction stability properties.

SPECIFICATION/TECHNICAL DATA

- Ford MERCON® V

Pack Size	20L
Item Code	3381057
Barcode	9310084022227

TRANSMAX ATF Z

(PLEASE REFER TO TRANSITION TABLE)

Castrol TRANSMAX ATF Z, formulated with Smooth Drive Technology™, is a full synthetic automatic transmission fluid. It can solve shiftability problems in automatic transmissions, enabling longer transmission life.

Castrol TRANSMAX ATF Z is recommended for use in automatic and semi-automatic transmissions used in cars, buses and coaches. As such, it is recommended for fleets employing a mixture of Voith, Renk, ZF, Allison and MB transmissions alongside the Leyland Pneumocyclic and Hydracyclic units. Extended oil drain [120,000 km] in ZF Ecomat and EcoLife, MB AT and Voith AT. TRANSMAX ATF Z, formulated with Smooth Drive Technology™, delivers enhanced protection and gives drivers a smoother drive for longer.

FEATURES & BENEFITS

- Enhanced friction durability for smooth transmission performance
- Enhanced wear protection to provide longer component life offers extended drain potential and lowers operating costs
- Excellent thermal and oxidative stability to effectively resist oxidation and maintains operational efficiency for longer
- Enhanced protection against deposits extends transmission life
- Temperature reduction in severe service improves transmission and oil service life and helps reduce fuel consumption and emissions
- Outstanding cold flow properties giving high protection to transmission especially at start-up
- A problem-solver for gear shiftability issues with over 15 years of trouble-free field performance.

SPECIFICATION/TECHNICAL DATA

- MB-Approval: 236.81
- MAN 339 Typ Z3, MAN 339 Typ Z12, MAN 339 Typ V2
- Voith 55.6336.XX
- VW 501.60
- ZF TE-ML 04D, 11B, 14C, 16M, 16S, 20C, 25C
- Recommended by Nissan where Matic Fluid D is required
- JASO 1A

Pack Size	3 x 4L	20L	205L
Item Code	3430514	3430516	3430515
Barcode	9310084034183	9310084034299	9310084034305

AUTOMATIC TRANSMISSION FLUIDS

TRANSYND 668

Castrol TranSynd 668 is a premium, full-synthetic automatic transmission fluid specifically formulated for Allison Transmission® on-highway automatic transmissions. TranSynd 668 provides oxidative stability, anti-wear performance, and friction durability, as well as TES 668™ specification differentiators such as extended anti-shudder durability and extended clutch friction durability. The TES 668™ spec is fully backwards compatible with both Allison TES 295® and TES 468™ applications.

FEATURES & BENEFITS

- Delivers improved gear protection
- Excellent corrosion and foaming resistance
- Excellent transmission cleanliness under all conditions permits extended oil-drain intervals and decreased servicing
- Excellent temperature reduction through reduced friction leads to longer oil and component life
- Outstanding cold-flow properties enables faster oil flow to all critical components particularly during cold starts.

SPECIFICATION/TECHNICAL DATA

- Allison® TES 668™
- Backwards compatible with both Allison TES 295® and TES 468™
- Voith H55.6335.xx
- Volvo Transmission Oil 97341
- MAN 339 V1
- DTFR 13C190 (MB 236.92).

Barcode	9310084034350	9310084035395

TRANSYND RD

Premium synthetic universal powershift and automatic transmission fluid. For 'rigorous duty' applications where extended drain intervals and reduced life cycle costs are designed in Allison 5000, 6000, 8000 and 9000 off-highway series transmissions.

Product sold exclusively through Allison Transmission Distributor Network, i.e. Heavy Automatics, Penske Power Systems & Transdiesel in Australia.

FEATURES & BENEFITS

- Premium synthetic technology
- Extended drain and filter change intervals
- Provides superior high and low temperature performance for all year round use in various geographical locations.

SPECIFICATION/TECHNICAL DATA

- Allison TES-353 (AN-032001)
- Allison C4-31554001

Pack Size	208L
Item Code	3370892

DIFFERENTIALS AND AXLE FLUIDS

TRANSMAX AXLE AP 80W-90

Castrol TRANSMAX Axle AP 80W-90 is a multipurpose gear oil for use in most trucks, LCV, and passenger cars' conventional differentials, non-synchronised manual transmissions, and steering gears where API GL-5 performance is required. It is not recommended for Eaton, Spicer, Renault, or Rockwell transmissions as those manufacturers prefer non-EP transmission oils.

FEATURES & BENEFITS

- Formulated for high thermal stability, reducing oxidation and deposits
- Excellent wear protection prolongs component life.

SPECIFICATION/TECHNICAL DATA

- API GL-5/MT-1
- SAE J2360
- Mack GO-J

TRANSMAX AXLE AP 85W-140

Castrol TRANSMAX Axle AP 85W-140 is a multipurpose gear oil for use in most trucks, LCV, and passenger cars' conventional differentials, non-synchronized manual transmissions, and steering gears where API GL-5 performance is required. It is not recommended for Eaton, Spicer, Renault, or Rockwell transmissions as those manufacturers prefer non-EP transmission oils.

FEATURES & BENEFITS

- Formulated for high thermal stability, reducing oxidation and deposits
- Excellent wear protection prolongs component life.

DIFFERENTIALS AND AXLE FLUIDS

TRANSMAX AXLE EPX 85W-140

(PLEASE REFER TO TRANSITION TABLE)

Castrol TRANSMAX Axle EPX 85W-140 is a multipurpose axle oil which may be used in differentials, final drives and other applications in passenger cars and commercial vehicles where API GL-5 performance is required. It is approved by ZF for use in a range of commercial applications including axles in off-road and agricultural equipment.

FEATURES & BENEFITS

- High load carrying capability ensures gears operating under high loads are protected prolonging component life
- High film strength ensures protection against wear and shock loads
- Good thermal/oxidation stability protects against the formation of deposits and oil thickening prolonging the life of components and lubricant.

SPECIFICATION/TECHNICAL DATA

- API GL-5
- ZF TE-ML 16D, 21A, 05A, 12E
- ZF approval numbers: ZF002148, ZF002173, ZF002177

TRANSMAX AXLE EPX 80W-90

(PLEASE REFER TO TRANSITION TABLE)

Castrol TRANSMAX Axle EPX 80W-90 is a multipurpose axle oil which may be used in differentials, final drives and other applications in passenger cars and commercial vehicles where API GL-5 performance is required. It is approved by MAN and ZF for use in a range of commercial applications including axles in off-road and agricultural equipment.

FEATURES & BENEFITS

- High load carrying capability ensures gears operating under high loads are protected, prolonging component life
- High film strength ensures protection against wear and shock loads
- Good thermal/oxidation stability protects against the formation of deposits and oil thickening, prolonging the life of components and lubricant.

DIFFERENTIALS AND AXLE FLUIDS

TRANSMAX LIMITED SLIP 85W-140

(PLEASE REFER TO TRANSITION TABLE)

Castrol TRANSMAX Limited Slip 85W-140 is a mineral based gear oil which is suitable for use in limited slip differentials in cars and commercial vehicles where API GL-5 performance is required. It is also suitable for use in conventional differentials.

FEATURES & BENEFITS

- Optimised and stable friction characteristics for effective operation of limited slip differentials throughout the drain interval
- Very good antiwear and load carrying performance even under high load conditions prolongs component life.

SPECIFICATION/TECHNICAL DATA

- API GL-5
- Limited slip applications
- Approved for use in Hino and Isuzu axles

TRANSMAX LIMITED SLIP 80W-90

(PLEASE REFER TO TRANSITION TABLE)

Castrol TRANSMAX Limited Slip 80W-90 is a mineral gear oil that is suitable for use in limited slip differentials in cars and commercial vehicles where API GL-5 oils with specific limited slip friction performance is required. It can also be used in conventional differentials.

FEATURES & BENEFITS

- Optimised and stable friction characteristics for effective operation of limited slip differentials throughout the drain interval
- Friction modified – providing desired frictional characteristics required by the clutches in the limited slip differential
- Very good anti-wear and load carrying performance even under high load conditions prolongs component life
- High film strength – providing protection against wear
- Thermally stable additive chemistry – less sludge and cleaner gears
- Anti-weld – high tooth loadings can be tolerated.

SPECIFICATION/TECHNICAL DATA

- API Service Classification GL-5
- Limited slip applications

DIFFERENTIALS AND AXLE FLUIDS

TRANSMAX UNIVERSAL 85W-140

(PLEASE REFER TO TRANSITION TABLE)

Castrol TRANSMAX Universal 85W-140 is a multipurpose gear lubricant for use in synchronised manual transmissions, final drives and differentials where API GL-5 is specified.

FEATURES & BENEFITS

- A single product for transmissions and final drives, reduces inventory and the potential for misapplication
- High temperature stability gives superior performance and extended drain potential
- Optimised synchroniser performance gives smooth gear shifting at all temperatures
- Excellent wear protection extends component life and reduces maintenance costs.

SPECIFICATION/TECHNICAL DATA

- API GL-5

Pack Size	205L	1000L

TRANSMAX LIMITED SLIP 80W-140

(PLEASE REFER TO TRANSITION TABLE)

Castrol TRANSMAX Limited Slip 80W-140 is a full synthetic rear axle fluid designed to provide protection at the extremes of low and high operating temperatures. It is recommended for competition, severe duty and long drain applications. It may be used in both limited slip and non limited slip differentials.

Applications include Holden V8 rear axles, trucks operating in severe service where high temperatures in differentials and power dividers are encountered, and competition vehicles e.g., Group A, sports sedans, Formula Holden and Rally cars.

FEATURES & BENEFITS

- Excellent high temperature and load performance provides maximum protection against wear and noise
- Low friction improves axle efficiency offering fuel economy improvements
- High shear stability ensures properties are retained over very long service periods
- Reduced operating temperatures increase life of gears and seals
- Wide viscosity range ensures suitability for use in all temperatures
- Compatible with mineral gear oils and seals so it may replace conventional oils with no need for seal changes or extensive flushing.

SPECIFICATION/TECHNICAL DATA

- API GL-5
- Suitable for use in axles with limited slip differentials

DIFFERENTIALS AND AXLE FLUIDS

SYNTRAX E 80W-140

Fully synthetic rear axle oil for arduous service in rear axle (differential) and power dividers.

Recommended for use in Eaton and Rockwell rear axles operating where long oil drain periods and extended warranty conditions apply. Also recommended for use under severe conditions, particularly in B-double or road train applications.

FEATURES & BENEFITS

- Thermally stable – provides protection at extremes of very low/high operating temperatures
- Improved performance over conventional mineral API GL-5 85W-140 lubricants
- Reduced wear, increased gear component life
- Approved for extended warranty programmes for longer rear axle drive life.

SPECIFICATION/TECHNICAL DATA

- SAE 80W-140
- API GL-5
- Eaton/Dana extended drain and warranty programme
- Dana SHAES 426
- SAE J2360
- Mack Go-J

TRANSMAX LIMITED SLIP LL 75W-140

Castrol TRANSMAX Limited Slip LL 75W-140, formulated with Smooth Drive Technology™, is a full synthetic hypoid gear oil formulated for use in both conventional and limited slip differentials. It has demonstrated outstanding performance in competition vehicles employing limited slip differentials. It is approved for use in the high-performance BMW-M Series and Mercedes Benz AMG limited slip differentials.

FEATURES & BENEFITS

- Reduces noise and vibrations in the axle
- Excellent shear stability maintaining performance over the life of the lubricant
- Exceptional stability at high temperatures extending the life of lubricant and axle
- Effective wear resistance ensures protection under high loads and prevents damage to components
- Very good low-temperature fluidity properties increase protection at start-up.

SPECIFICATION/TECHNICAL DATA

- API GL-5
- MB-Approval 235.61
- ZFTE-ML 05C, 12D, 16G, 18, 21C
- BMW LS Rear Axles
- Recommended for Nissan GTR limited slip axles
- * SAE Class according to J306 pre-1998
- ZF approval number: ZF002141

DIFFERENTIALS AND AXLE FLUIDS

TRANSMAX AXLE LONG LIFE 75W-90

Castrol TRANSMAX Axle Long Life 75W-90, formulated with Smooth Drive Technology™, is a full synthetic rear axle fluid. It provides superior protection, especially when driving under stop-start or extreme conditions e.g. towing. This enables smoother axle operation and noise reduction, resulting in a more comfortable drive throughout the lifetime of the vehicle. It is specially designed and approved by BMW for use in all BMW final drives fitted with conventional (non limited slip) differentials. TRANSMAX Axle Long Life 75W-90 is Castrol's prime recommendation for final drives in heavy commercial vehicles, and is approved by MAN and ZF.

FEATURES & BENEFITS

- Fuel savings and reduced emissions due to balanced viscometrics and frictional characteristics
- Superior low temperature fluidity pumpability ensures optimum protection at start up under all conditions
- Excellent thermal and oxidative stability provides final drive and differential cleanliness which permits extended drain and decreased servicing
- Optimal anti-wear, extreme pressure performance at all ambient temperatures and load conditions
- Excellent temperature reduction and shear stability enhance final drive performance and extends component life.

SPECIFICATION/TECHNICAL DATA

- API GL-5
- BMW (Non-Limited Slip Rear Axles) according to Service Instruction 33 01 96 (149)
- MAN 342 S1
- ZF TE-ML 05A, 12B, 17B, 19C, 21A
- Transmax Axle Long Life 75W-90 is registered under the following ZF approval number: ZF002142

DIFFERENTIALS AND AXLE FLUIDS

TRANSMAX AXLE LONG LIFE 75W-140

Castrol TRANSMAX Axle Long Life 75W-140 is a full synthetic final drive lubricant that is suitable for use in axles and final drives in commercial vehicles and passenger cars where API GL-5 performance is required. Transmax Axle Long Life 75W-140 is included in the Scania high-performance product list and is approved against Scania STO 2:0A.

FEATURES & BENEFITS

- Excellent anti-wear and extreme pressure performance at all ambient temperatures and load conditions provides superior protection, longer component life and reduced repair costs
- Excellent cold flow properties reduce torque loss and increase fuel efficiency
- Improved protection at start-up and in cold conditions
- Excellent thermal and oxidative stability combined with superb temperature reduction protects against pitting
- Excellent shear stability permitting longer oil and component life
- Extended drain reduces repair costs.

TRANSMAX UNIVERSAL LL 75W-90

(PLEASE REFER TO TRANSITION TABLE)

Castrol TRANSMAX Universal LL 75W-90 formulated with Smooth Drive Technology™ is a full synthetic multipurpose manual transmission and final drive lubricant. It may be used in synchronised manual transmissions and final drives/differentials of a wide range of vehicles (commercial vehicles, construction equipment) where API GL-4 or API GL-5 fluids are required. It carries a number of OEM approvals.

FEATURES & BENEFITS

- A single product for transmissions and final drives reducing inventory and the potential for misapplication
- Excellent low temperature fluidity provides improved shift quality and wear protection in cold conditions and improves fuel efficiency
- Superior high temperature stability and excellent wear protection even in the most arduous conditions prolongs equipment life and allows for extended oil drain intervals
- Full compatibility with conventional mineral oils and seals allows this product to be used in a wide range of applications.

TRANSMAX DYNADRIVE LONG LIFE 80W-90

Castrol TRANSMAX Dynadrive Long Life 80W-90 is a part-synthetic SAE 80W-90 gear oil specifically developed to meet all the gear oil requirements for both manual transmissions and final drives. The unique additive system provides the extreme pressure protection needed in heavy-duty differentials as well as the frictional properties required for smooth shifting synchromesh manual transmissions.

FEATURES & BENEFITS

- High oxidative stability enables better component cleanliness and longer oil life, resulting in extended servicing
- Excellent viscosity/temperature characteristics
- Synthetic base oil provides enhanced lubricant durability
- Excellent shear stability ensures high performance throughout the lubricant's life
- Being one product for both manual and final drive transmissions, it offers rationalisations that reduce workshop stockholding and helps prevent service filling errors
- Reduced gear change baulking at low temperatures
- Excellent differential cleanliness
- Reduced wear
- Extended drain
- Excellent transmission performance
- Extended axle bearing life.

TRANSMAX OFFROAD FD 60

Castrol TRANSMAX Offroad FD 60 is a monograde final drive lubricant recommended for use in Caterpillar final drives according to their FD-1 requirements.

NB: Not recommended for use in Caterpillar transmissions as it does not meet the frictional requirements.

FEATURES & BENEFITS

- Caterpillar's preferred performance level for final drives and axles that do not contain friction material
- Extended drain potential of up to double compared with TO-4 performance oils in off highway truck final drives
- Enhanced wear protection to increase durability of the final drive
- Excellent oxidation stability reduces oil thickening and prevent deposits extending component and lubricant life
- Compatibility with seals materials and with TO-4 type fluids eliminates the risks of operational problems when changing to new lubricant.

Manual Transmission fluids

Castrol Manual Transmission Fluids product transitions

At Castrol, we know that keeping things simple is critical for your success. It's one of the reasons we're undertaking one of the biggest updates ever simplifying our portfolio whilst we continue deliver the best products, with latest industry and OEM approvals, whilst eliminating unnecessary complexity.

We appreciate that change can take some getting used to so don't forget that your local Castrol Technical Helpline is only ever a phone call away to ensure you've got the right product for the right application.

MANUAL TRANSMISSION FLUIDS

TRANSMAX MANUAL VMX 80W

(PLEASE REFER TO TRANSITION TABLE)

A manual transmission fluid of advanced design especially developed to provide easier gear changes over a wide temperature range.

It is particularly versatile in cold weather as it reduces shift effort at start-up, as well as controlling transmission noise and idle rattle at operating temperatures.

It should be used in manual transmissions of most car and light commercial vehicles (LCV's) requiring GL-4 performance, where improved low temperature shift performance is required.

FEATURES & BENEFITS

- Quieter transmission operation and easier low temperature gear shifting improves driving experience
- Improved gear tooth and bearing durability reduces the risk of breakdown and extends component life
- Effective lubrication over a wide temperature range
- It can be used as a low drag gearbox oil in 2-stroke motorcycles with separate gearboxes.

TRANSMAX MANUAL E LONG LIFE 40

Synthetic lubricant designed for fuel efficiency, extended drain intervals and severe service in heavy duty commercial vehicle transmissions which require a non-EP transmission lubricant. It is specially formulated to protect higher torque transmissions coupled with increased horsepower engines.

It is approved for use in Eaton transmissions such as Ultrashift Plus, Fuller Advantage, FR and RT Series.

FEATURES & BENEFITS

- Proven to provide better fuel economy versus PS 164 type transmission fluids
- High performance and extended drain capabilities in transmissions
- Excellent thermal and oxidation stability which resists deposit and sludge formation.

SPECIFICATION/TECHNICAL DATA

- Eaton PS 386 approved

TRANSMAX LIMITED SLIP 75W-85

Castrol TRANSMAX Limited Slip 75W-85 is a full synthetic high-performance SAE 75W-85 gear lubricant, specifically developed for highly loaded limited-slip axles of modern vehicles. It is also suitable for use in axles and non synchronised manual gearboxes, where API GL-5 performance level is recommended by the manufacturers.

FEATURES & BENEFITS

- Excellent anti-wear and extreme pressure performance at all ambient temperatures and load conditions provide better final drive protection leading to longer life and reduced repair costs
- Excellent cold flow properties reduces torque loss and increases efficiency and ensures improved protection at start up in cold conditions
- Excellent thermal and oxidative stability combined with operating temperature reduction
- Excellent shear stability permitting longer oil and component life.

SPECIFICATION/TECHNICAL DATA

TRANSMAX MANUAL LONG LIFE 75W-85

(PLEASE REFER TO TRANSITION TABLE)

Castrol TRANSMAX Manual Long Life 75W-85 is a full synthetic transmission fluid recommended for most commercial vehicle manual transmissions (truck, bus, light commercial vehicle) where API GL-4 lubricants are required. These transmissions are generally larger and subjected to higher loads and temperatures than those in passenger cars. Castrol TRANSMAX Manual Long Life 75W-85 was developed for these particular requirements and is approved by a number of manufacturers.

FEATURES & BENEFITS

- Excellent thermal and oxidative stability maintains transmission cleanliness and lubricant performance allowing extended drain capability
- Synthetic formulation provides a reduction in operating temperatures giving longer component and lubricant life
- Superb cold flow characteristics give smoother gear shifts at low temperatures
- High shear stability maintains lubricant performance throughout the drain interval
- Good wear and EP performance ensures component protection under high load conditions reducing downtime and service costs.

MANUAL TRANSMISSION FLUIDS

TRANSMAX MANUAL AT 75W-90

Castrol TRANSMAX Manual AT 75W-90 is a synthetic fluid approved for use in the manual transmissions of Mercedes Benz Actros vehicles.

FEATURES & BENEFITS

- Excellent viscosity temperature characteristics provide effective lubrication over a wide temperature range
- Smooth gear shifting at low temperatures increases transmission efficiency and aids fuel economy
- Very good wear protection, especially under high loads, extends component life and reduces downtime and service costs.

SPECIFICATION/TECHNICAL DATA

- API GL-4

TRANSMAX MANUAL HEAVY DUTY 75W-90

Castrol TRANSMAX Manual Heavy Duty 75W-90 is a full synthetic manual transmission lubricant developed for use in synchronised and non-synchronised transmissions in long haul trucks, b-double road trains and other severe duty applications. Castrol TRANSMAX Manual Heavy Duty 75W-90 is approved against Volvo's most demanding Heavy Duty Manual Transmission specification, enabling extended oil drain intervals (400k kms) in severe duty manual and automated manual (i-Shift) transmission applications. It is also suitable for use in manual transmissions of cars or light commercial vehicles where GL-4 oils are recommended.

FEATURES & BENEFITS

- Excellent oxidation stability ensures suitability in high temperature and extended drain applications
- Proven synchroniser performance makes easier gear changes, transmission operation quieter and reduces driver fatigue
- Excellent low temperature fluidity ensures easy cold start gear shifting
- Excellent wear protection reduces wear and prolongs gear life
- Long drain performance offers the potential to lower maintenance costs and increase vehicle availability.

SPECIFICATION/TECHNICAL DATA

TRANSMAX MANUAL FE 75W

Castrol TRANSMAX Manual FE 75W, formulated with Smooth Drive Technology™, is a full synthetic transmission fluid recommended for most passenger car conventional manual and "dry clutch" transmissions where API GL-4 lubricants are required. It is approved for use where Ford WSSM2C200-D2 is specified.

FEATURES & BENEFITS

- Low viscosity synthetic formulation offers the potential for fuel economy benefits while maintaining excellent wear protection
- Good cold flow properties provides added protection on start up and improves shift quality
- Excellent frictional characteristics extends synchroniser life and improves shift comfort
- High shear stability maintains performance over the lifetime of the lubricant
- Excellent high temperature stability maintains transmission cleanliness prolonging the life of transmission and lubricant.

SPECIFICATION/TECHNICAL DATA

- API GL-4
- MB-Approval 235.73
- Meets Ford WSS-M2C-200-D2

MANUAL TRANSMISSION FLUIDS

TRANSMAX MANUAL Z LONG LIFE 75W-80

Castrol TRANSMAX Manual Z Long Life 75W-80 is a full synthetic SAE 75W-80 fluid developed specifically to meet ZF extended drain intervals requirements (540,000 km) and is approved for use in all ZF commercial manual and automated manual transmissions. It can be recommended in other manual transmissions requiring API GL-4 and is particularly suitable for severe applications where loads and temperatures are higher.

FEATURES & BENEFITS

- Excellent frictional characteristics with carbon, sinter bronze and molybdenum synchronisers provide improved shift quality and extend component life
- Temperature reduction in operation extends the life of the oil and components aiding extended drain intervals and reducing downtime and repair costs
- Provides excellent low-temperature fluidity giving improved protection and smooth gear shifts at low temperatures
- Excellent thermal and oxidative stability extends the life of transmission and lubricant extending drain intervals and reducing service needs
- Excellent wear and EP performance protects components under high loads, extending component life and reducing maintenance costs.

EV fluids

Switch ON an Electric Future

An advanced range of EV Fluids to help electric vehicles **go further¹, charge faster² and last longer^{3*}.**

* Castrol EV Fluids benefits are demonstrated in bespoke testing and development.
¹ vs mass market EV factory fill fluid ² vs indirect cooled battery system ³ vs standard EV transmission fluid.

EV TRANSMISSION FLUIDS

ON EV TRANSMISSION FLUID D1

COMING Q1 2024

Castrol ON EV Transmission Fluid D1 is a full synthetic, high performance, high efficiency fluid for transmissions with dry e-Motors. It is an advanced EV Transmission Fluid that helps extend the life of the drivetrain system and helps vehicles go further^{1*} on a single charge. This next generation transmission fluid supports the requirement towards increasing torque levels and maximum efficiency.

FEATURES & BENEFITS

Castrol ON EV Transmission Fluid D1 has the following advantages:

- Excellent balance of reduced fluid viscosity and extremely good gear and bearing protection
- Very good cold flow properties
- High shear stability
- Excellent thermal and oxidative stability.

Pack Size	5L
Item Code	3434054
Barcode	9310084035487

ON EV TRANSMISSION FLUID D2

COMING Q1 2024

Castrol ON EV Transmission Fluid D2 is a full synthetic, high performance, high efficiency fluid for transmissions with dry e-Motors. It is an advanced EV Transmission Fluid that helps extend the life of the drivetrain system and helps vehicles go further^{1*} on a single charge. This next generation transmission fluid supports the requirement towards increasing torque levels and maximum efficiency.

FEATURES & BENEFITS

Castrol ON EV Transmission Fluid D2 has the following advantages:

- Excellent balance of reduced fluid viscosity and extremely good gear and bearing protection
- Very good cold flow properties
- High shear stability
- Excellent thermal and oxidative stability.

Coolants

Castrol Coolant product transitions

At Castrol, we know that keeping things simple is critical for your success. It's one of the reasons we're undertaking one of the biggest updates ever simplifying our portfolio whilst we continue deliver the best products, with latest industry and OEM approvals, whilst eliminating unnecessary complexity.

We appreciate that change can take some getting used to so don't forget that your local Castrol Technical Helpline is only ever a phone call away to ensure you've got the right product for the right application.

OLD PRODUCT NAME	OLD PACK SIZE	OLD ITEM CODE	NEW PRODUCT NAME	NEW PACK SIZE	NEW ITEM CODE	TIMING
RADICOOL SF Premix	208L	3417111	RADICOOL SF Premix	205L	3430230	Oct-23

RADICOOL SF / RADICOOL SF PREMIX

A long-life coolant based on monoethylene glycol with advanced organic acid inhibitor technology. In contrast to traditional antifreeze coolants, Castrol RADICOOL SF does not contain amines, nitrites, phosphates, silicates or other inorganic inhibitors.

Castrol RADICOOL SF provides excellent corrosion protection particularly to those engines employing light metals. It is suitable for a wide range of OEMs.

Castrol RADICOOL SF works over a wide operating temperature range for effective engine cooling in all climates, and offers freezing protection between -18°C and -37°C depending on concentration. Castrol RADICOOL SF Premix has been diluted to 50% concentration with distilled water, providing freezing protection down to -37°C.

FEATURES & BENEFITS

- Special inhibitor package enables longer drain intervals with excellent protection against corrosion, cooling system blockage, overheating and freezing
- Suitable for use in engines employing cast iron, aluminium, copper or combinations of these metals used in modern engine designs. It is also compatible with all standard rubber hoses, gaskets and seals used within the cooling system
- Possesses a longer operational life by allowing extended drain intervals of 3 years plus
- Longer drain intervals mean reduced cost and less possibility of harm to the environment
- Excellent protection against cavitation corrosion and effective water pump lubrication, reducing wear and noise
- Additive technology used prevents the build up of calcium deposits (scale) from use of hard water, thereby reducing possibility of radiator blocking and restricted flow of coolant. This technology also improves the fluid's heat transfer properties ensuring engines run at optimum temperatures
- Contains a bittering agent to deter from accidental ingestion.

RADICOOL P-OAT / RADICOOL P-OAT PREMIX

Castrol RADICOOL P-OAT is a nitrite, amine, borate and silicate free antifreeze coolant for vehicles requiring Phosphated Organic Additive Technology (P-OAT), such as those from Japanese and Korean manufacturers. Aqueous solutions of Castrol RADICOOL P-OAT act as both antifreeze and coolant and offer excellent corrosion protection to all metal parts found in the cooling systems of internal combustion engines.

Castrol RADICOOL P-OAT should be used at concentrations of between 33% and 50% dilution with distilled or de-ionised water to give optimum corrosion protection and freezing protection between -16°C and -37°C.

FEATURES & BENEFITS

- Suitable for use with a wide range of engines including those of aluminium, cast iron or combinations of those two metals. Also suitable for cooling systems made of aluminium, copper or their alloys
- Suitable for Japanese and Korean vehicles requiring P-OAT coolants
- Suitable for use where a coolant meeting Ford WSS-M97B57-A1 (Concentrate) or Ford WSS-M97B57-A2 (Premix) is required
- Protects for up to 3 years and has the following advantages:
 - Excellent corrosion protection to protect metals used in cooling systems.
 - Superior cavitation protection prevents pitting wear of the cooling system.
 - Improved heat transfer through removal of silicates in the formulation.
 - Suitable for a wide range of applications, including automotive and heavy duty.

SPECIFICATION/TECHNICAL DATA

- ASTM D3306(I) (Concentrate)
- ASTM D3306 (III) (Premix)
- ASTM D6210
- JASO JIS K2234
- Suitable for use in vehicles from Japanese and Korean manufacturers
- Suitable for use where a coolant meeting Ford WSS-M97B57-A1 is required (Concentrate)
- Suitable for use where a coolant meeting Ford WSS-M97B57-A2 is required (Premix)

RADICOOL SI-OAT / RADICOOL SI-OAT PREMIX

A long-life coolant for the latest vehicles requiring Organic Acid inhibitor Technology (OAT) with added silicates. Castrol RADICOOL Si-OAT acts as both antifreeze and coolant and offers excellent corrosion protection to all metal parts found in the cooling systems of internal combustion engines.

Castrol RADICOOL Si-OAT should be used at concentrations of between 33% and 50% dilution with purified water to give optimum corrosion protection and freezing protection between -18°C and -37°C depending on concentration. Castrol RADICOOL Si-OAT Premix has been diluted to 50% concentration with distilled water, providing freezing protection down to -37°C.

FEATURES & BENEFITS

- Formally approved by MAN for use in those vehicles specifying MAN 324 Type Si-OAT coolants, including those vehicles built after Dec 2012
- Also suitable for use in older vehicles previously using MAN 324 Type NF and MAN 324 Type SNF fluids
- Approved for use in VW, Audi, Porsche, Skoda, Bentley, Lamborghini and Seat vehicles requiring VW TL-774G approval (G12++). It is also compatible with older VW TL-774C (G11) and VW TL-774F (G12+) type fluids and can be used where VW TL-774J (G13) fluid is recommended
- Suitable for all Mercedes-Benz vehicles manufactured after 10/2011
- Protects for up to 3 years and has the following advantages:
 - Excellent low temperature protection
 - Provides superior protection against all forms of corrosion
 - Minimises deposit formation, because of its phosphate free formulation
 - Approved for use in Euro 6 generation truck and bus engines
 - Does not contain amines, nitrites, phosphates or borates.

SPECIFICATION/TECHNICAL DATA

RADICOOL NF / RADICOOL NF PREMIX

REPLACES ANTIFREEZE NF

An antifreeze coolant formulated using hybrid OAT technology that is free of nitrites, amines and phosphates.

It provides excellent protection against corrosion, and because it contains no phosphate, the problems of deposits in some performance engines are eliminated.

Castrol RADICOOL NF should be used at concentrations of between 33% and 50% dilution with purified water to give optimum corrosion protection and freezing protection between -18°C and -37°C depending on concentration. Castrol RADICOOL NF Premix comes pre-diluted to 50% concentration, providing freezing protection down to -37°C.

FEATURES & BENEFITS

- Protects for up to 5 years/ 9000 hours or 600,000km
- Excellent low temperature protection
- Provides excellent protection against corrosion
- Efficient lubrication of water pumps
- Compatible with conventional seal and hose materials used in engine cooling systems.

SPECIFICATION/TECHNICAL DATA

- VW TL-774C (G11)
- MTU MTL 5048
- MAN 324 Typ NF
- Deutz DQC CA-14
- MB-Approval 325.0 (Concentrate)

RADICOOOL CONCENTRATE / RADICOOOL PREMIX

A general purpose ethylene glycol based coolant with corrosion inhibitors to protect aluminium alloys, copper and cast iron engine components.

Suitable for older cars and light commercial vehicles with petrol and diesel engines (prior to 2000).

CONCENTRATE: Mix with equal parts of water for optimum performance.

FEATURES & BENEFITS

- Contains no nitrites, amines or phosphates
- Effective engine cooling without boiling
- Protection against corrosion in the alloys used in the cooling systems of modern vehicles
- Protection against freezing down to -19°C for Premix, and between -18°C and -36°C for Concentrate depending on concentration
- Protection against electrolysis
- Protection against cavitation corrosion
- Efficient lubrication of water pumps
- Compatible with conventional hose and seal materials used in engine cooling systems.

SPECIFICATION/TECHNICAL DATA

- AS 2108-2004 Type A (concentrate only)
- BS 6580:2010
- ASTM D3306 (I) (concentrate only)

RADICOOL PG PREMIX

A ready-to-use fully formulated Hybrid technology propylene glycol based engine coolant. It is a low silicate, phosphate and amine free product that is recommended for use in automotive (aluminium compatible), light duty and heavy-duty diesel applications including transport, mining, farming and marine. It's extended life formulation provides up to 6 years/12,000 hours off-road maintenance free service, without the need of SCA.

Castrol RADICOOL PG Premix is a pre-mixed, ready to use coolant. Do not dilute further.

FEATURES & BENEFITS

- Considered non toxic - contains Propylene Glycol (PG)
- Extended life
- No initial SCA requirement at initial fill
- Product is compatible with standard SCAs and coolant extenders
- Universal use, suitable for use in all vehicle types including those requiring: Caterpillar EC1, MTU (EVP 1 1827/MTL5048), Detroit Diesel (Bulletin #7SE 298)
- Low silicate
- Phosphate and amine free
- Hard water compatible
- Provides exceptional summer cooling and excellent freezing protection during winter.

PERFORMANCE LEVELS

- ASTM D3306 (IV), ASTM D4985, ASTM D6210
- AS/NZS 2108.1:1997 Type A
- TMC RP330

Pack Size	1000L	Bulk
Item Code	3381707	3381708
Barcode	9310084023163	

RADICOOL NON-GLYCOL PREMIX

Castrol RADICOOL Non-Glycol Premix is a ready-to-use water-based corrosion inhibitor formulated with organic acid technology (OAT). It is formulated without ethylene glycol, phosphates, silicates, borates, nitrates, nitrites and amines. can be used in petrol, diesel and gas engines and is therefore suitable for cars, buses, trucks, tractors, as well as for use in industrial and mining applications.

Castrol RADICOOL Non-Glycol Premix can be used where an anti-freeze anti-boil coolant is not specified.

FEATURES & BENEFITS

- Engine protection in a wide range of light duty and heavy duty applications
- Free from ethylene glycol, amine, borate, phosphate, nitrates, nitrites and silicate
- Compatible with other long life OAT based engine coolants
- Compatible with hard water.

PERFORMANCE LEVELS

- ASTM D3306(III)
- AS/NZS 2108:2004 "Type B"
- ASTM D4985
- Suitable for applications which require
- ASTM D4340

Pack Size	1000L	Bulk
Item Code	3424484	3426454
Barcode	93100840320	

The images shown are for illustration purposes only and may not be an exact representation of the product.

PREMIUM COOL PLUS / PREMIUM COOL PLUS 50

Low silicate ethylene glycol based engine coolant – phosphate and amine free formulation providing extended service life protection for lead solder, aluminium, yellow metal and ferrous alloys.

For US, European and Japanese turbocharged and naturally aspirated diesel engines, particularly wet liner engines, operating in on-highway and off-road environments and arduous city stop-start driving conditions.

Not generally recommended for petrol engines. For Mercedes Benz, use Radicool NF.

FEATURES & BENEFITS

- 1,000,000km/8000hrs/4 years (whichever occurs first) service life in heavy duty diesel engines
- Fully conforms to the warranty requirements of most major HD diesel engine OEM's
- Covers the needs of a wide range of engines meaning less coolants need to be stocked, assists rationalisation
- Guaranteed performance in the widest range of diesel engines
- Compatible with most commercial SCA's.

SPECIFICATION/TECHNICAL DATA

- PCP = concentrate – use as recommended by the manufacturer but not as less than 40% or more than 55% in heavy duty diesel engines
- PCP50 = premix – pre-diluted to 50%, ready to use, do not dilute further
- Australian Standard: AS2108-2004
- International Standard: TMC RP 329
- ASTM D 3306, ASTM D 4985 and ASTM D6210 (HDDE coolants not requiring a pre-charge of SCA).

Brake fluids

BRAKE FLUID DOT 3

Suitable for use in disc and drum brakes and hydraulic clutch systems where a non-petroleum based DOT 3 fluid is specified. Certain Japanese vehicles may stipulate DOT 3 brake fluids.

It is NOT recommended where DOT 4, Super DOT 4 or DOT 5 brake fluids are specified.

FEATURES & BENEFITS

- High level of protection against wear
- Fully compatible with other brake fluids meeting FMVSS 116 DOT 3, DOT 4
- Proven track record in braking systems over many years of reliable service.

SPECIFICATION/TECHNICAL DATA

- Australian Standard AS 1960.1-2005 Grade 1
- FMVSS Class DOT 3
- SAE J1703

Pack Size	6x500ML	20L
Item Code	3377668	3377667
Barcode	9310084019999	9310084023293

BRAKE FLUID DOT 4

Castrol Brake Fluid DOT 4 is suitable for use in all brake fluid systems in cars, motorcycles, and light commercial vehicles (LCV's) requiring either a DOT 3 or DOT 4 product (excluding brake systems where a mineral based fluid is specified).

It can be used with either disc or drum brakes including vehicles fitted with ABS systems. It is also suitable for use in hydraulic clutch systems.

Meets the latest Holden low temperature brake fluid viscosity requirements.

NOTE: For vehicles operating under heavier loads or extreme conditions, Castrol React Performance DOT 4 brake fluid is strongly recommended.

FEATURES & BENEFITS

- High boiling point easily meets or exceeds U.S. FMVSS DOT 3 and DOT 4 wet/dry specialisation requirements
- High vapour lock temperature – greater protection against brake fluid vaporization
- Advanced corrosion protection – better protection against corrosion caused by absorbed moisture, that can contribute to lower maintenance costs
- High temperature stability – provides a greater margin for safety because the product performance will not fade under higher temperatures
- Rubber swell control – contributes to efficient operation of the braking system components
- Compatible with all other brake fluids that meet either DOT 3 or DOT 4 Specification.

SPECIFICATION/TECHNICAL DATA

- Australian Standard AS 1960.1-2005 Grade 2
- FMVSS Class DOT 4
- SAE J1704

Pack Size	6x500ML	3x4L	20L
Item Code	3377669	3377671	3377670
Barcode	9310084020216	9310084020209	9310084022500

The images shown are for illustration purposes only and may not be an exact representation of the product.

REACT PERFORMANCE DOT 4

Castrol React Performance DOT 4 is a performance, high boiling point polyglycol type brake fluid designed to provide superior braking performance in a variety of vehicles, especially those that operate at higher temperatures or under increased loads.

Suitable for use in all brake fluid systems in cars, motorcycles and light commercial vehicles (LCV's) requiring either a DOT 3, DOT 4 or Super DOT 4 product.

Do not use: in brake systems where a mineral oil based fluid is specified.

FEATURES & BENEFITS

- High boiling point: Exceeds US FMVSS DOT 3 and DOT 4 specification requirements
- High vapour lock temperature
- Outstanding protection against corrosion caused by absorbed moisture that can cause rusting and failure of components
- Rubber swell control: Contributes to efficient operation of the braking system components
- Compatible with all other brake fluids that meet either DOT 3, DOT 4 or Super DOT 4 specifications.

SPECIFICATION/TECHNICAL DATA

- Australian Standard AS 1960.1-2005 Grade 3
- FMVSS Class DOT 4
- SAE J1704

Pack Size	6x500ML	3x4L	20L
Item Code	3377737	3377736	3377735
Barcode	9310084020247	9310084020230	9310084022760

REACT SRF RACING

Castrol React SRF Racing brake fluid is a high performance brake fluid of special value in competitive motorsport where extreme braking conditions are encountered.

It has been especially formulated to maximise braking performance under arduous competitive conditions. In order to achieve the optimum benefits in such applications, patented silicon ester materials have been employed in a unique Castrol formulation.

It is suitable for all disc and drum brake systems used in motorsport with the exception of those for which a mineral oil is prescribed.

FEATURES & BENEFITS

- Race Proven: Widely used in racing, from Formula One, sports cars, V8 Supercar and Grand Prix and Superbike motorcycles
- High Boiling point – exceeds the boiling point requirements of DOT 5 brake fluids
- High Vapour Lock Point.

SPECIFICATION/TECHNICAL DATA

- US FMVSS 116 DOT 3 and DOT 4
- ISO 4925 Class 4
- SAE J1703

Pack Size	6x1L
Item Code	3379573

Greases

AGRI GREASE ULTRA

High performance grease for a wide range of farm and associated machinery applications, including cars, trucks, 4WDs and pumps. Proven performance in severe duty applications, protecting ball & roller bearings, especially on-land/on-road, high load applications.

FEATURES & BENEFITS

- One grease simplifies servicing and avoids misapplication
- One grease reduces inventory, which saves money
- Contains corrosion inhibitors to provide protection between seasons
- High melting point ensures lubrication is maintained in high temperature applications
- Can be used in disc brake wheel bearings.

SPECIFICATION/TECHNICAL DATA

- Lithium Complex
- Smooth-Tacky
- NLGI 2
- Drop Point °C 260+
- Dark green

MINE GREASE

Castrol Mine Grease is an extreme pressure lithium grease formulated with specially selected base oil combinations that provide optimal pumpability.

Castrol Mine Grease also contains 3% molybdenum disulphide, which provides additional wear protection under conditions of vibratory motion.

FEATURES & BENEFITS

- Superior EP properties provide protection against extreme shock loading
- High performance corrosion inhibitors protect equipment and reduce maintenance costs and downtime
- Excellent pumpability reduces the risk of blocked lubrication lines and lubrication starvation
- Outstanding structural stability means the lubricant does not slump out of the application.

SPECIFICATION/TECHNICAL DATA

PREMIUM HEAVY DUTY

Designed for plain and roller bearing applications operating at temperatures beyond the limits of conventional Lithium greases.

The excellent stability, load carrying and high temperature performance of Castrol Premium Heavy Duty make it particularly suitable for use in wheel bearings of vehicles operating at high speeds over long distances, or where prolonged heavy braking is likely to give higher than normal hub temperatures.

Castrol's primary recommendation for vehicles operating with disc brakes. It is also recommended for general purpose greasing on a wide range of industrial plant, particularly if operating under conditions of high load and temperature.

FEATURES & BENEFITS

- Excellent thermal stability and wide temperature range
- Reduced oil separation and resistance to hardening under pressure
- High load carry capacity
- Good water resistance
- Excellent EP and anti-wear properties – protects equipment against extreme loading and assists in minimising bearing component wear
- An optimized combination of Lithium thickener, highly refined base oil and specially selected base oil offers excellent all-round operating performance.

SPECIFICATION/TECHNICAL DATA

- Lithium Complex
- NLGI 2
- Blue and Tacky
- Dropping Point 260°C

RED RUBBER GREASE

Specifically formulated for rubber to rubber lubrication where any effects such as hardening or swelling of the rubber must be avoided. It therefore can be used on automotive hydraulic brake and clutch components where compatibility with natural rubber and SBR seals are involved. It may also be used to assist the assembly of natural and synthetic rubber components for automotive brakes or clutch systems and suspension units.

FEATURES & BENEFITS

- Excellent stability at high temperatures
- Good corrosion resistant properties
- Excellent compatibility with both natural and synthetic rubber components.

SPECIFICATION/TECHNICAL DATA

- Lucas Girling – TS -2-34-04
- NLGI 2-3
- Castor-bentone
- Worked penetration at 25°C is typically 245 – 275

SPHEEROL AP 3

Universal type medium consistency grease containing oxidation and corrosion inhibitors.

Recommended for electric motor bearings & high speed bearings.

FEATURES & BENEFITS

- Corrosion inhibitor additives ensure protection of metal surfaces extending bearing life
- Oxidation inhibitors extend the life of the grease in high temperature applications minimising the need for re-greasing
- Water resistance ensures good levels of protection in wet applications.

SPECIFICATION/TECHNICAL DATA

- Lithium
- NLGI 3
- Drop Point 180°C
- Rust & oxidation inhibitors

SPHEEROL BTX 2

A high performance grease developed for use in a wide range of mining and industrial applications.

It combines excellent extreme pressure, anti wear agents and corrosion inhibitors.

Engineered to provide outstanding protection of ball and roller bearings in high speed load applications.

FEATURES & BENEFITS

- Water resistant containing a powerful corrosion inhibitor to protect lubricated machinery parts under wet conditions
- A unique combination of extreme pressure and antiwear agents, corrosion and oxidation inhibitors in a proven adhesive lithium complex base.

SPECIFICATION/TECHNICAL DATA

- Lithium complex grease
- NLGI 2
- Drop Point 250°C

Pack Size	450G	20KG	180KG	Bulk
Item Code	3413942	3413941	3413940	3413943

SPHEEROL EPL RANGE

Castrol Spheerol™ EPL is a range of greases which comprises lithium based products, containing highly refined mineral oils, fortified with extreme pressure (EP) additives as well as corrosion and oxidation inhibitors. These greases have been formulated with additives that provide good film strength under medium to high loads.

FEATURES & BENEFITS

- High mechanical stability – the grease keeps its consistency in service ensuring long lubricant life
- Good adhesion – continuous lubrication and reduced consumption as film stays between lubricated surfaces
- Good water resistance – the grease film remains on the surface even in the presence of water
- Resistant to copper and steel corrosion – helps prevent rust and oxidation on metal surfaces
- Excellent EP and anti-wear properties – protects equipment against extreme loading and helps minimise bearing component wear.

SPHEEROL EPLX 200 RANGE

Castrol Spheerol™ EPLX 200-1 and 2 are multi-purpose high-performance greases based on mineral oil and a lithium-complex soap; they are formulated to provide excellent high-temperature lubrication performance.

They possess EP load-carrying properties, and contain additives selected to enhance oxidation, corrosion and wear resistance.

FEATURES & BENEFITS

- High operating temperature capability
- Suitable for highly loaded and vibratory working conditions
- Maximum equipment protection
- Long service life
- Excellent anti-corrosion properties
- Very adhesive to surfaces.

SPHEEROL FPG

Castrol Spheerol™ FPG is a lithium soap thickened grease formulated with a blend of antiwear and extreme pressure additives along with a sophisticated polymer that provides exceptional water resistant characteristics.

The manufacturing process and carefully controlled consistency of Castrol Spheerol FPG ensures optimal pumpability across a wide range of conditions.

The technology used to formulate Castrol Spheerol FPG ensures maximum protection against grease loss due to the effects of water wash and severe shock loading. This enables reduced grease consumption and longer component life.

FEATURES & BENEFITS

- Excellent pumpability prevents grease starvation related equipment failures
- Resistance to water washout reduces usage and extends the life of components
- Antiwear and extreme pressure properties reduce wear under heavy duty conditions
- Excellent adhesion to metals, providing lubrication under extreme operating conditions and shock loading.

Pack Size	450G	20KG	180KG	Bulk
Item Code	3414154	3414153	3414152	3413944
Barcode	9310084029660	9310084029646	9310084029639

SPHEEROL JBG

Castrol Spheerol™ JBG is a lithium/calcium mixed soap thickened grease formulated with a blend of antiwear and extreme pressure additives along with a sophisticated polymer that provides exceptional water resistant characteristics. The grease is marked by its exceptional mechanical stability, provides rust and oxidation protection and is approved to specification AAR M-942 (revised 1992). The manufacturing process and carefully controlled consistency of Castrol Spheerol™ JBG ensures optimal pumpability across a wide range of conditions.

FEATURES & BENEFITS

- Excellent pumpability prevents grease starvation related equipment failures
- Resistance to water washout reduces usage and extends the life of components
- Antiwear and extreme pressure properties reduce wear under heavy duty conditions
- Excellent adhesion to metals, providing lubrication under extreme operating conditions and shock loading.

Pack Size	20KG	180KG
Item Code	3414150	3414151
Barcode	9310084029684	

SPHEEROL HTB

Non-melting bentone clay based grease suitable for very high temperature applications up to 140C.

Ideal for front wheel bearings in cars with disc brakes operating at very high temperatures.

FEATURES & BENEFITS

- Bentone based so it is suitable for a wide working temperature range
- Suitable for heavy and shock loading capabilities
- High thermal stability giving enhanced service life.

SPECIFICATION / TECHNICAL DATA

- NLGI 2
- Bentone clay

Pack Size	450G	2.5KG	20KG

SPHEEROL LMM

Heavy duty grease combining molybdenum disulphide with extreme pressure additives.

For use where shock load protection is required for automotive ball joints and constant velocity joints.

FEATURES & BENEFITS

- Good load carrying capacity – protects equipment against extreme loading and helps prevent damage caused by shock loading and excessive vibration
- Good water resistance
- Resistant to copper and steel corrosion – helps prevent rust and oxidation on metal surfaces
- High mechanical stability – the grease keeps its consistency in service, ensuring long term protection
- Good adhesion – continuous lubrication and reduced consumption as film stays between lubricated surfaces.

SPECIFICATION/TECHNICAL DATA

SPHEEROL™ LC 2M

Castrol Spheerol™ LC 2M is a premium lithium complex, extreme pressure grease intended for a wide range of applications. It is formulated to provide excellent high temperature performance, with good adhesion, structural stability and resistance to water.

This grease has a high level of chemical stability and offers excellent protection against rust and corrosion. It contains molybdenum disulfide to provide added wear protection of sliding components and chassis parts. The maximum operating temperature range is -30°C to +175°C with appropriate relubrication intervals.

Castrol Spheerol LC 2M does not contain lead, chlorine or nitrites.

FEATURES & BENEFITS

- Reduced downtime and maintenance costs because of outstanding protection against wear, rust and corrosion
- Extended service life in high temperature applications
- Excellent resistance to water washout and contamination.

Pack Size	450G	20KG	180KG
Item Code	3422314	3422313	3422312

SPHEEROL SY RANGE

Castrol Spheerol™ SY Range are lithium complex thickened lubricating greases based on synthetic base fluid. The grease contains antioxidants, corrosion inhibitors and Extreme Pressure / Anti Wear additives.

FEATURES & BENEFITS

- Outstanding high and low temperature performance
- Very good mechanical stability
- High load carrying capability
- Good corrosion protection.

SPHEEROL SBX RANGE

Lithium complex grease primarily designed to meet the SKF requirements for sugar mill roller bearing grease.

The extreme load capacity makes it ideal for bucket pins, plain bearings and other heavy duty applications in the mining, sugar milling and general industrial industries.

Suitable for low speed bearings and some open gear applications.

The 5% molybdenum disulphide in Castrol Grease meets certain minimum requirements of OEM's such as Caterpillar and Komatsu.

FEATURES & BENEFITS

- Advanced EP additives between gear tooth surfaces
- Corrosion protection
- Water resistant
- Good pumpability at low temperatures
- Helps maintain a separating film
- Excellent load carrying ability
- Metal surfaces will not corrode
- Does not breakdown when washed.

SPHEEROL ULTRATAK

Multipurpose lithium complex grease which has special properties in wet environments. Primarily suited for earthmoving bucket pins, ball, roller and plain bearings under high load.

FEATURES & BENEFITS

- Excellent all round performance offering improved performance and protection
- Outstanding load carrying and anti-wear properties
- Special properties in wet conditions with dramatic decrease in water washout
- Excellent resistance to corrosion even in salt water conditions.

SPHEEROL SHL 00

Castrol Spheerol™ SHL 00 is a semi-fluid grease formulated in synthetic fluid (PAO) and Lithium Complex thickener. It is used for the lubrication of truck wheel hub assemblies, where minimal leakage is desired, and long service life is essential.

Spheerol SHL 00 can help alleviate oil leakage from wheel seals that can damage brake shoes, increase maintenance costs, and affect the overall safety of the unit. Spheerol SHL 00 can be utilised in many types of wheel end systems designed for oil, and many systems using conventional greases.

FEATURES & BENEFITS

- Lithium Complex thickener promotes exceptional service life through excellent water resistance, shear stability, and high temperature stability
- Contains synthetic (PAO) base stocks for low and high temperature performance and stability
- Extreme pressure and anti-wear additives extend bearing life by protecting against wear, rust, corrosion, and high temperature.

	SPHEEROL SHL 00
Pack Size	15.8KG
Item Code	3437494
Barcode	9310084036194

SPHEEROL LMEP 680

Castrol Spheerol LMEP 680 is an extreme pressure lithium grease formulated with specially selected additives which provide superior protection under arduous operating conditions. It also contains 3% molybdenum disulfide, which provides additional wear protection under conditions of vibratory motion.

Castrol Spheerol LMEP 680 is ideally suited for the lubrication of heavily loaded plain and anti-friction bearings used in construction, earth moving and mining equipment. Castrol Spheerol LMEP 680 provides protection against wear under heavy and shock loads, high temperature and wet environments.

FEATURES & BENEFITS

- Superior EP properties provide protection against extreme shock loading
- High performance corrosion inhibitors protect equipment and reduce maintenance costs and downtime
- Excellent pumpability reduces the risk of blocked lubrication lines and lubrication starvation
- Outstanding structural stability means the lubricant does not slump out of the application.

Pack Size	450G	20KG	850KG	Bulk

Hydraulic fluids

HYSPIN AWH-M RANGE

High quality range of shear stability, high viscosity hydraulic fluids with excellent anti-wear performance.

Suitable for use in a diverse range of hydraulic systems that are subject to wide variations in temperature.

For use in off-highway and marine applications and indoor manufacturing equipment.

FEATURES & BENEFITS

- Can be used over a wide temperature range with good shear stability
- Excellent anti-wear performance provides extended wear protection
- Reduced downtime, prolonged lubricant life.

HYSPIN AWH RANGE

A range of high quality mineral oils with a viscosity index improver, enhanced with a zinc additive.

For modern hydraulic equipment operating under severe service conditions, i.e. wide temperature range and high pressures, injection moulders, earthmoving hydraulic systems, machine tools and agricultural equipment.

FEATURES & BENEFITS

- High viscosity index offers rapid response at cold start up
- Viscosity is maintained with high ambient temperatures ensuring wear protection and maximum efficiency
- Optimum machine performance.

SPECIFICATION/TECHNICAL DATA

Castrol Hyspin AWH is classified as follows:

- ISO 6743/4 - Hydraulic Oils Type HV
- Castrol Hyspin AWH grades meet the requirements (for appropriate viscosity grade) of DIN 51524 Part 3

HYSPIN AWS RANGE

High quality mineral oil based hydraulic fluid containing zinc for industrial equipment including injection moulding plus a wide range of machinery including presses, machine tools (CNC machines), certain gearboxes, bearing lubrication systems and many more applications requiring an oil with good anti-wear and anti-oxidant properties.

Suitable for gear, vane and piston type hydraulic pumps, except those containing silver or cadmium.

FEATURES & BENEFITS

- Optimise machine performance
- Extended life of seals
- Reduced downtime, increased productivity
- Reliability and extended pump life.

HYSPIN HVI RANGE

The Castrol Hyspin™ HVI range of high viscosity index (VI) oils is based on a carefully selected ashless (formulated without zinc) additive system designed to meet and exceed the most exacting performance standards. Hyspin HVI oils are intended for severely stressed hydraulic systems requiring a high level of anti-wear performance and fine filtration. The Castrol Hyspin HVI range is fully compatible with elastomer materials commonly used for static and dynamic seals, such as nitrile, silicone and fluorinated (e.g. Viton) polymers.

Applications include:

- Outdoor equipment which are likely to operate over wide temperature ranges, such as machinery subjected to cold start up conditions and high temperature continuous running. Examples include off-highway and marine applications
- Indoor manufacturing equipment that incorporates control systems requiring minimal viscosity change with temperature. Examples include precision machine tools.

FEATURES & BENEFITS

- High viscosity index and low pour point enables the product to be used over a wide temperature range. Good shear stability means no excessive loss in viscosity due to mechanical shearing
- Excellent anti-wear performance provides extended wear protection for hydraulic pumps. Reduced down time due to unscheduled maintenance and savings from replacement part costs
- Excellent water separation and hydrolytic stability means reduced down time through prolonged lubricant life and increased equipment reliability
- Excellent thermal and oxidative stability provides reliable performance and extended oil life in severe applications. Minimal deposit formation gives a cleaner system and reduced frequency of filter changes.

HYSPIN HDH 7000

Castrol Hyspin® HDH 7000 is a very high performance mineral oil based hydraulic fluid with exceptional air release properties and shear stability which provide peak hydraulic performance for extended periods.

The extremely stable viscosity properties of Castrol Hyspin® HDH 7000 provides a double benefit of optimum cold start, and run hydraulic control, with correct hydraulic efficiency at normal and high operating temperatures.

FEATURES & BENEFITS

- Extremely stable viscosity. Improved cold start-ups – peak hydraulic performance immediately available and maintained
- Superior air release properties. Maintains hydraulic performance – maximum efficiency, minimal wear
- Advanced anti-wear additives. Protection of pump and hydraulic components – reduced maintenance, less downtime
- Good anti-rust properties. Reduced wear caused by rust particles – improved reliability of hydraulic components
- High aniline point. Ensures controlled effect on synthetic rubbers – extended life of seals.

HYSPIN ZZ RANGE

A range of non-zinc, mineral oil based hydraulic fluids proven to be resistant to the effects of “dieseling” in highly stressed systems such as plastic injection moulding.

Designed for use in all hydraulic systems in high temperatures exposed to water ingress or where a high level of filterability is required.

Also useful where silver and/or cadmium components are used or where the risk of environmental damage due to spillage (non-zinc) is a concern with normal zinc antiwear additives.

FEATURES & BENEFITS

- Contains oxidation and corrosion inhibitors with antifoam and demulsification additives
- High antiwear performance, allowing pumps to operate at high temperatures without excess water
- Zinc and heavy metal free, providing non contaminated waste water for environmentally friendly disposal
- Excellent water tolerance – will not break down in presence of water nor form deposits. Therefore, can be used in operations where water ingress occurs
- Thermal stability allows it to be used in high temperature applications.

Castrol Industrial product transitions

At Castrol, we know that keeping things simple is critical for your success. It's one of the reasons we're undertaking one of the biggest updates ever simplifying our portfolio whilst we continue deliver the best products, with latest industry and OEM approvals, whilst eliminating unnecessary complexity.

We appreciate that change can take some getting used to so don't forget that your local Castrol Technical Helpline is only ever a phone call away to ensure you've got the right product for the right application.

INDUSTRIAL PRODUCTS

INDUSTRIAL GEAR BOXES

ALPHA SP RANGE

High quality, mineral oil based extreme pressure gear oils.

Recommended for the lubrication of industrial gear boxes using forced circulate or splash and oil bath lubrication.

FEATURES & BENEFITS

- Sulphur-phosphorous EP additives provide good load carrying ability, reducing gear tooth wear
- Withstands elevated temperatures for extending service life
- Corrosion inhibitors provide ongoing protection of gear teeth
- Excellent demulsification properties help to maintain full lubricating film with no loss of performance
- Anti-foam additives maintain full lubricating film.

INDUSTRIAL PRODUCTS

INDUSTRIAL GEAR BOXES

ALPHASYN PG RANGE

Synthetic gear oil primarily intended for use in worm reduction gear boxes, where the low coefficient of friction of the polyalkylene glycol (PAG) base fluid improves efficiency and consequently reduces power consumption and operating temperatures.

Meets requirements of most OEM's that allow the use of PAG based gear oils.

FEATURES & BENEFITS

- High VI makes it suitable for operations over a wide temperature range
- Low coefficient of friction reduces energy consumption and lowers operating temperatures, leading to longer oil life
- Good thermal and oxidative stability provides reliable operation and extended operating life when compared to mineral oil based products.

SPECIFICATION/TECHNICAL DATA

- Viscosity: 220, 460

ALPHASYN EP RANGE

High quality synthetic lubricant based on poly-alphaolefin (PAO) fluids & sulphur/Phosphorus. Extreme pressure additive technology providing good thermal and high load carrying capacity.

FEATURES & BENEFITS

- Excellent equipment protection with minimal wear and tear – provides long term equipment performance and reliability
- Synthetic gear oil that provides excellent high temperature stability to extend machine service life
- EP additives protect gears at high temperatures, reducing bearing and gear tooth wear
- High viscosity index provides high film strength at elevated temperatures.

INDUSTRIAL PRODUCTS

INDUSTRIAL GEAR BOXES

ALPHA WT RANGE

Fully formulated gear oil specially designed to mix with water when contamination occurs. Recommended for use wherever Joy TO-HD lubricants are specified or where water contamination of gear boxes is a concern.

FEATURES & BENEFITS

- Formulated with an emulsifier package to provide lubrication in wet environments
- Provides premium wear protection of components.

SPECIFICATION/TECHNICAL DATA

- Exceeds EP performance of Joy TOHD specifications

OPTIGEAR SYNTHETIC PD ES RANGE

The Castrol Optigear Synthetic PD ES range is based on synthetic hydrocarbons (PAO) with Castrol's advanced gear oil system which gives special plastic deformation (PD) and surface improvement performance. The additive package, when activated by high specific loads and corresponding temperatures, helps to equalize surface roughness without creating abrasion leading to the surface improvement (plastic deformation).

The Castrol Optigear Synthetic PD ES range may be used in spur gear, bevel gears or planetary gear units and in heavy loaded gear units. It is also suitable for the lubrication of oil-lubricated rolling bearings. It is especially designed to reduce friction losses and can reduce energy consumption compared to more conventional lubricants. The lower friction observed with Castrol Optigear Synthetic PD ES range means less stress in the contact point subsurface area, which means lower risk for pittings and micropittings.

FEATURES & BENEFITS

- High load carrying capacity
- Very low friction coefficient and frictional torque
- Superior micropitting protection
- Surface smoothing effect
- Excellent bearing lubrication suitability
- Good filtration properties
- Long life lubricant.

SPECIFICATION/TECHNICAL DATA

- The Castrol Optigear Synthetic PD ES range is a CLP-HC gear oil (according to DIN 51502) and exceeds the minimum requirements according to DIN 51517, part 3, CLP gear oils and is formulated with detergent type additives
- Castrol Optigear Synthetic PD 220 ES and PD 320 ES gear oils are approved by Flender (Flender gear units - Listing T 7300, Rev. 16, formerly Siemens Mechanical Drives)

INDUSTRIAL PRODUCTS

INDUSTRIAL GEAR BOXES

MOLUB-ALLOY GM 1500

PLEASE REFER TO TRANSITION TABLE

Castrol Molub-Alloy™ GM 1500 (previously called Molub-alloy™ 1500) gear oil is a severe duty, Extreme Pressure (EP) gear oil designed to meet the increasing lubrication needs and specifications of manufacturers of modern industrial and mining equipment such as walking draglines. To withstand the surging pressures and sudden reversal in speed and direction of hoist and drag gears and the great torque experienced in swing and propel gears, the ultimate in oil film forming and persistence is required.

FEATURES & BENEFITS

- Formation of a stable lubricant film on tooth flanks over a wide temperature range even at lower speed due to good viscosity/temperature characteristics
- Boundary (contact) lubrication with Molub-Alloy lubricating solids occurs when the oil film is squeezed thin during extreme and shock loading, and at start-up or other conditions which exceed the capabilities of fluid film lubrication. Contact lubrication protects working surfaces against spalling, and minimizes wear caused by cold welding
- Where lubricating solids protect gear surfaces from contact friction, they minimize the frictional heat which could reduce oil film strength by lowering its viscosity
- Improved surfaces and reduced heat of friction may substantially increase the working life of both parts and lubrication oil
- Overall savings are derived from the above and result from less labour and downtime, smoother, more efficient operation with longer parts life, and extended lubrication cycle.

MOLUB-ALLOY 6040 RANGE

EP GREASES

Castrol Molub-Alloy™ 6040 greases are extreme pressure (EP) multi-service lubricants designed to give outstanding performance in a wide variety of applications. They may be used in either journal or antifriction bearings in the most demanding industrial applications under extreme environmental conditions.

Castrol Molub-Alloy 6040 is manufactured from the highest quality petroleum oil and thickened with a unique calcium complex sulfonate unsurpassed for mechanical shear stability. Castrol Molub-Alloy 6040 greases are compounded with chemical additives for EP characteristics and with select Castrol Molub-Alloy lubricating additives for thin-film, high-pressure anti-wear protection. They are also inhibited against high temperature oxidation and corrosion.

FEATURES & BENEFITS

- Corrosion and oxidation inhibitors maximise rust protection and grease life.
- Operating temperature range of -40°C to +140°C
- The load carrying and anti-wear capabilities of Castrol Molub-Alloy™ 6040 exceed conventional complex greases
- Castrol Molub-Alloy™ 6040 multi-service greases offer excellent oxidation resistance and resist washing out, even under adverse water contamination. This product has been designed to work with aggressive process waters
- Reduced friction due to the effect of the Castrol Molub-Alloy additives is most evident under boundary and mixed-film lubrication conditions. This benefit is most pronounced where frequent start-up, slow speeds or high and unexpected heavy loads are encountered
- Overall savings are derived from the above and result from less labor and downtime, smoother, more efficient operation with longer parts life and extended lubrication cycles.

Additional Information

Castrol Molub-Alloy™ 6040 greases should not be mixed with greases using a different thickener.

Relubrication intervals should be increased gradually to ensure the complete removal of the previous lubricant and to use additives to their full advantage.

Castrol Molub-Alloy™ 6040 greases can be applied with grease guns or automatic dispensing systems.

INDUSTRIAL PRODUCTS

INDUSTRIAL GREASE

MOLUB-ALLOY 860 RANGE

MULTI-PURPOSE HIGH PERFORMANCE GREASE

Castrol Molub-Alloy™ 860 ES greases are high-performance multi-service lithium complex greases formulated from premium petroleum base oils, lubricating solids and a combination of corrosion inhibitors specifically chosen for protection against corrosive process waters. These are designed to extend the service life of bearings in heavy-duty applications and at elevated temperatures. Castrol Molub-Alloy 860 ES greases provide an appropriate oil film for applications at slower to moderate speeds, higher loads, and/or higher temperatures sustained for longer periods of time.

The load carrying and anti-wear capabilities of Castrol Molub-Alloy 860 ES greases exceed conventional complex greases.

High performance is the result of chemical additives working synergistically with select Castrol Molub-Alloy lubricating solids which are dispersed uniformly throughout the grease. These lubricating solids offer their greatest benefit at slow speeds or when bearings endure heavy loads and shocks. Solids also protect newly machined bearing surfaces during the critical period of 'running in'. Good bearing surfaces are essential for long service life.

FEATURES & BENEFITS

- Excellent friction reduction characteristics due to Castrol Molub-Alloy solid lubricants – easier start-up, reduced heat, and reduced energy leading to longer bearing life
- Exceptional water resistance – coating film stays on the surface in the presence of water, even when exposed to the action of hot and chemically active process water
- Excellent EP and anti-wear properties – protects equipment against extreme/shock loading and helps minimise bearing component wear and hence extends equipment life
- Excellent mechanical stability and adhesion – grease keeps its consistency in service ensuring long-term protection and reduced consumption as the film stays between lubricated surfaces
- Outstanding oxidation/thermal stability and high dropping point – provides reliable performance and extended lubricant life in high-temperature applications
- Formulated to address environmental concerns – it is free of antimony, barium, lead, and zinc.

INDUSTRIAL PRODUCTS

INDUSTRIAL GREASE

MOLUB-ALLOY 1000 HT

EXTREME TEMPERATURE GREASE

Castrol Molub-Alloy™ 1000 HT (previously called Molub-Alloy™ 1000) extreme temperature grease utilises synthetic base oils in conjunction with a blend of lubricating solids selected for high temperature service. The synthetic fluids in Castrol Molub-Alloy 1000 HT were selected for their controlled low volatility, minimum residue after evaporation and high VI for additional film strength at elevated temperatures.

The combination of synthetic fluids and a unique thickening system offers physical stability in prolonged service at high temperatures. Castrol Molub-Alloy 1000 HT remains more pliable than conventional high temperature greases.

As a result of the higher viscosity, synthetic base fluids used in Castrol Molub-Alloy 1000 HT, the film strength at elevated temperature is superior to that of petroleum base oils. It is also formulated with a combination of rust and oxidation inhibitors for prolonged service life without relubrication.

FEATURES & BENEFITS

- Excellent friction reduction characteristics due to Castrol Molub-Alloy solid lubricants – easier start-up, reduced heat, and reduced energy leading to longer bearing life
- Synthetic base fluid and unique thickening system – the combination of synthetic fluids and a unique thickening system offers physical stability in prolonged service at high temperatures. This combination makes Castrol Molub-Alloy 1000 HT more pliable than conventional high temperature greases, leading to longer bearing life, extended lubrication cycles and uninterrupted service
- Castrol Molub-Alloy 1000 HT grease is engineered for prolonged service from 177°C to 288°C. Castrol Molub-Alloy 1000 HT also withstands intermittent exposure to temperatures up to 343°C
- Formulated to address environmental concerns – it is free of antimony, barium, lead, and zinc.

INDUSTRIAL PRODUCTS

INDUSTRIAL GREASE

MOLUB-ALLOY 777 ES

HIGH PERFORMANCE GREASE

Castrol Molub-Alloy™ 777 ES greases are designed for very heavy duty service in extreme environments.

They are blended and compounded to withstand heavy and shock loading, commonly found in the steel/primary metals, construction, mining, and forest products industries.

Castrol Molub-Alloy 777 ES greases are made using a blend of high quality petroleum oils, polymers and Castrol Molub-Alloy lubricating solids. These lubricating solids work synergistically with chemical anti-wear and extreme pressure (EP) additives to reduce contact temperatures and wear while providing outstanding protection under extreme pressure and shock load conditions.

Rust and oxidation inhibiting characteristics are maximised to ensure effective rust protection and the long life of the grease.

FEATURES & BENEFITS

- Excellent friction reduction characteristics due to Castrol Molub-Alloy solid lubricants – easier start-up, reduced heat, and reduced energy leading to longer bearing life
- Excellent mechanical stability – grease keeps its consistency in service ensuring long term protection
- Easily pumpable in central lubrication systems
- Excellent water resistance – coating film stays on the surface even in the presence of water
- Protects against copper and steel corrosion
- Excellent EP and anti-wear properties – protects equipment against extreme/shock loading and helps minimise bearing components wear and extend equipment life.

INDUSTRIAL PRODUCTS

AIR COMPRESSOR OILS

AIRCOL SN 100

Range of synthetic diester based compressor lubricants, suitable for very severe operating conditions.

Primarily recommended for reciprocating compressors.

FEATURES & BENEFITS

- Low volatility and high flash points for enhanced safety
- Combined minimal deposit forming tendency with long drain potential, reduces maintenance and downtime.

SPECIFICATION/TECHNICAL DATA

- Viscosity: 100 available

	Aircol SN 100

AIRCOL SR RANGE

Range of synthetic based, high performance air compressor oils formulated to provide a significantly longer service life in modern oil flooded rotary screw compressors, especially when compared to conventional mineral oil based products.

Suitable for use in all single and two stage oil flooded rotary screw compressors, both stationary and portable types.

FEATURES & BENEFITS

- Very low deposit forming tendency, extends service life of filters and separators
- Meets the requirements of Atlas Copco 8000 hour oil drain interval
- Outstanding oxidation stability and antiwear performance providing long lubricant and equipment life.

SPECIFICATION/TECHNICAL DATA

- Viscosity: 46 and 68 available
- DIM 51506 classification VDL
- ISO 6743/3- DAG, DAH and DAJ for rotary air compressors
- Meets requirements of Atlas copco 8000 hour oil drain intervals
- Kaeser.

AIR COMPRESSOR OILS

AIRCOL CM RANGE

The Castrol Aircol™ CM compressor oil range of high quality lubricants are based upon highly refined mineral oil, enhanced with additive technology providing excellent thermal and oxidative stability and good load carrying capacity, compared to other products in the same class.

Castrol Aircol CM grades are formulated without zinc additives (ashless oils), recommended for the lubrication of rotary screw and reciprocating compressors.

SPECIFICATION/TECHNICAL DATA

- Viscosity: 32, 46, 68, 100
- ISO 6743-3 compressor oils
- DAA and DAB for reciprocating (piston) and drip free rotary air compressors
- DAG and DAH for oil-flooded rotary screw air compressors
- Meet the requirements of the DIN 51506 VDL classification for reciprocating compressors having air discharge temperatures up to 220°C.

HEAT TRANSFER OILS

PERFECTO HT 5

Castrol Perfecto HT 5 is based on a solvent-refined, high viscosity index mineral oil specially selected for its high thermal and oxidation stability.

FEATURES & BENEFITS

- Tightly controlled specification helps minimise deposits in heat exchangers in order to maintain heat transfer efficiency
- High operating temperature capability in closed systems with temperatures up to 320°C permitted.

SPECIFICATION/TECHNICAL DATA

- Castrol Perfecto HT 5 is primarily intended for use in closed heat transfer systems with bulk temperatures up to 320°C. It can also be used in open systems at much lower bulk oil temperatures
- Castrol Perfecto HT 5, because of its solvency and high thermal stability serves as excellent Turbine Flushing oil.

PERFECTO HT 12

Castrol Perfecto HT 12 is based on a solvent-refined, high viscosity index mineral oil specially selected for its high thermal and oxidation stability.

FEATURES & BENEFITS

- Controlled specification helps minimise deposits in heat exchangers in order to maintain heat transfer efficiency
- High operating temperature capability in closed systems with temperatures up to 300°C permitted.

SPECIFICATION/TECHNICAL DATA

- Castrol Perfecto HT 12 is primarily intended for use in closed heat transfer systems with bulk temperatures up to 300°C
- It can also be used in open systems at much lower bulk oil temperature.

INDUSTRIAL PRODUCTS

FIRE RESISTANT HYDRAULIC FLUIDS

ANVOL PE 46 B

Castrol Anvol™ PE 46 B is a high-performance fire resistant hydraulic fluid which is primarily intended for use in steam turbine governor and boiler control systems. It is based on butylphenyl phosphate esters selected for their excellent hydrolytic stability and contains carefully selected corrosion and oxidation inhibitors. It has excellent hydraulic performance and provides good fire risk protection.

FEATURES & BENEFITS

- Offers good fire risk protection in systems where fire resistance is vital and where water containing fluids are unsuitable due to temperature limitations or the need to maintain a high hydraulic system pressure
- High flash point, fire point and auto-ignition temperature provides excellent fire resistance
- High resistivity eliminates spool valve corrosion/erosion due to electrokinetic effects
- Low chlorine level minimises valve erosion
- High level of fluid cleanliness - minor amounts of particulate contamination can cause abrasive wear, filter blockage and valve sticking.

SPECIFICATION/TECHNICAL DATA

- Meets the requirements of major OEMs such as General Electric, Siemens, Mitsubishi Hitachi Power Systems and Alstom
- Meets requirement of FM Global against Standard 6930 for 'Less flammable hydraulic fluids'
- Meets the requirements of ISO Standard 12922 and ASTM D4293 for HFDR-type fire-resistant hydraulic fluids.

Pack Size	20L	205L
Item Code	3427625	3427624
Barcode	9310084033100	9310084033117

ANVOL WG 46

Castrol Anvol™ WG 46 is an HF-C type water-glycol fire resistant hydraulic fluid, containing anti-wear additives and corrosion inhibitors. It provides excellent protection against rust and vapor phase corrosion.

In hydraulic pump tests, Castrol Anvol WG 46 has shown high levels of anti-wear performance. Its foam resistance, low temperature flow, emulsion stability and storage stability are also excellent.

FEATURES & BENEFITS

- Excellent anti-wear performance: gives wear protection and reduces downtime from unscheduled maintenance
- Excellent Fire resistance: cannot be ignited in spray ignition tests
- Excellent glycol in water stability: true solution means longer service and storage life
- Outstanding corrosion protection: provides protection below the liquid surface and in the vapour phase
- Exceptionally low pour point: ensures consistent performance over a wide temperature range.

SPECIFICATION/TECHNICAL DATA

Castrol Anvol WG 46 meets the fire resistance requirements of:

- 7th Luxembourg Report
- FM Global 6930

INDUSTRIAL PRODUCTS

METAL WORKING OILS

ILOFORM PN 403

Castrol Iloform™ PN 403 is a low viscosity, chlorine and heavy metal free, metal stamping fluid. It is a blend of high lubricity boundary lubrication additives and wetting agents, in low odour isoparaffinic hydrocarbon.

Iloform PN 403 is specially formulated for use in light duty sheet metal stamping operations where very low residues are required, in most cases eliminating the need for inter process cleaning.

It is specifically suitable for stamping of low to medium collar height aluminium fins, in the refrigeration industry and shows excellent compatibility with the industries special requirements.

FEATURES & BENEFITS

- Excellent health, safety, and environmental profile. Formulated on mild odour, very low aromatic isoparaffinic hydrocarbon, and free from chlorinated and heavy metal containing constituents such as Barium
- Contains high performance boundary lubricants, which maximise punch life and provide excellent surface finish. Minimises costs associated with tool repolishing
- Quick drying, low residue characteristics can eliminate requirements for inter process cleaning
- Superior wetting provides thin, homogenous lubricating film
- Low viscosity. Maximises flushing effect to aid removal of particulates from punches and dies, minimising component defects. Reduces drag out rates hence reduces product consumption
- Low odour and improved working environment. Excellent operator acceptability.

Pack Size	208L
Item Code	3432916

INDUSTRIAL PRODUCTS

ROCK DRILL OILS

MAGNA RD

For use in mining, quarrying, constructions, road works, tunnelling and excavations.

Consist of selected mineral oils specially compounded with lubricity fortifiers, corrosion inhibitors, emulsifiers and tackiness additives.

Recommended for the following well-known companies including Gardner-Denver, Atlas Copco and SIG.

FEATURES & BENEFITS

- High film strength
- Ability to absorb excess water when 'wet air' or wet drilling attachments are present
- Provide a suitable seal between piston and cylinder
- Reduced wear, helps maintain maximum percussion efficiency and allows operation in conditions of high or low temperatures
- Preferentially adhere to metal surfaces and resist blow-off
- Improved protection wear against wear caused by poor lubrication
- Reduced wear, allows operation in conditions of high or low temperatures.

SPECIFICATION/TECHNICAL DATA

- ISO Viscosity Grade 100, 150, 320

INDUSTRIAL PRODUCTS

TRANSFORMER OILS

PERFECTO TR IN

Castrol Perfecto TR IN (previously called Inhibited Transformer Oil) is a pure mineral hydrocarbon oil, specially refined and blended from selected crudes. It is an inhibited product, optimised for high performance to meet the stringent requirements of International Standards IEC 60296, Edition 4.0, 2012 02.

FEATURES & BENEFITS

- High dielectric strength and low power loss
- Excellent resistance to oxidation leading to enhanced equipment life
- Excellent cooling properties
- High purity and flash point
- Excellent low temperature fluidity allowing use in extreme climates.

SPECIFICATION/TECHNICAL DATA

- Designed for use as a high performance transformer, switchgear and circuit breaker oil which conforms to the international specification IEC60296:2012, inhibited oil.

Pack size	208L
Item Code	3428775
Barcode	9310084033339

PERFECTO X RANGE

The Castrol Perfecto X turbine oil range of lubricants is based upon premium quality mineral oils enhanced with rust and oxidation inhibitors to give maximum protection at high temperatures.

Castrol Perfecto X grades are recommended for industrial gas turbines where the lubricant is likely to be exposed to very high localised temperatures. They are also suitable for the lubrication of steam turbines and Combined Cycle generating systems where the steam and gas turbines share a common supply.

Castrol Perfecto X grades possess excellent air release performance, a high resistance to foaming and excellent water separation properties.

FEATURES & BENEFITS

- High resistance to oxidation and thermal degradation provides a very long life lubricant because of low deposit/ lacquer formation
- Excellent water separation and corrosion inhibition mean reduced down time through prolonged lubricant life and increased equipment reliability
- Excellent air release properties mean they meet the requirements of all turbine manufacturers
- Suitable for the lubrication of both gas and steam turbines makes them applicable for Combined Cycle generating stations.

SPECIFICATION/TECHNICAL DATA

Castrol Perfecto X range meet or exceed the requirements of:

- BS 489: 1999

PERFECTO XEP RANGE

The Castrol Perfecto XEP range of turbine oils is formulated from severely hydro treated premium mineral base stocks together with a complex additive system to provide requisite anti wear performance and oxidative stability.

FEATURES & BENEFITS

- Meets or exceeds a wide range of both steam and gas turbine specifications
- Designed for a wide range of applications making it possible to rationalise grades without risk of misapplication
- Excellent thermal/oxidation stability
- Good water separation and corrosion inhibition performance.

SPECIFICATION/TECHNICAL DATA

- The Castrol Perfecto XEP range is primarily intended for the lubrication of highly loaded industrial gas turbines, aero derivative power turbines and driven machinery and turbo machinery where the lubricant is exposed to high local temperatures during operation and the heat soaking period during run down
- The Castrol Perfecto XEP range possess the requisite air release, foaming and water separation properties for steam turbines making them suitable and compliant for gas and steam turbines in single train sharing a common oil reservoir
- Specific Grades within the Castrol Perfecto XEP range meet or exceed the requirements of:
 - BS 489 1999

POWER1 RACING 2T

Full synthetic 2-stroke engine oil with proven performance in extreme race conditions.

It is specifically designed for the latest generation of high output air and water-cooled Japanese and European 2-stroke on and off road motorcycle engines.

It may also be used in Go-Kart racing engines, or wherever Castrol ACTIV 2T is recommended.

FEATURES & BENEFITS

- High protection formula enhances throttle response for fast acceleration
- Significantly reduced exhaust smoke
- Suitable for both oil injection and premix lubrication, up to a fuel/oil ratio of 50:1.

POWER1 RACING 4T 5W-40

BECOMES POWER1 ULTIMATE 4T 5W-40 IN 2024

Full synthetic 4-stroke engine oil suitable for use in high performance and competition 4-stroke, Japanese and European motorcycle engines, including all high performance multi-cylinder, multi-valve, V-Twin, air or water-cooled sports or race replica models.

Castrol POWER1 RACING 4T has a race proven formula that demonstrates outstanding clutch friction control, gear wear control, engine wear protection and cleanliness in competition applications.

FEATURES & BENEFITS

- Ensures optimum engine performance, providing increased acceleration under the most arduous riding conditions
- Enhanced engine smoothness throughout the rev range
- Superior engine wear protection
- Excellent wet clutch friction control even in competition applications
- Superior engine cleanliness promoting longer engine life.

POWER1 ULTIMATE 4T 5W-40

(PLEASE REFER TO TRANSITION TABLE)

Castrol POWER1 ULTIMATE, with Full Synthetic technology, is engineered for outstanding performance across 5 critical areas.

Castrol POWER1 ULTIMATE's 5-in-1 formula delivers outstanding performance and acceleration.

Castrol POWER1 ULTIMATE 4T 5W-40 is suitable for all makes of 4-stroke bikes, both carburettor or fuel injected where API SN (or below) and JASO MA or MA2 are recommended.

Complies with requirements of catalyst equipped engines.

When choosing oil, please refer to your owner's handbook and the product specifications.

FEATURES & BENEFITS

The 5-in-1 formula of full synthetic Castrol POWER1 ULTIMATE 4T 5W-40 delivers a range of benefits including:

1. Excellent acceleration*
2. Excellent protection
3. Smooth riding
4. Temperature control
5. Enduring performance.

*Acceleration benefits will be subject to riding style and oil viscosity grade

POWER1 RACING 4T 10W-50

Castrol POWER1 RACING 4T 10W-50 is a fully synthetic engine oil for modern, high performance 4-stroke sports bikes that increases engine acceleration and power right up to maximum rpm.

Castrol POWER1 RACING 4T, using 'Race Derived Technology' based on Castrol's long and successful racing association, flows fast and stays strong, reducing internal engine friction even under the most arduous riding conditions.

It has been tested and proven to deliver exceptional acceleration and power at the touch of the throttle.

The added Castrol advantage of Trizone Technology™ ensures uncompromised performance protection - ultimate performance for extreme riding.

FEATURES & BENEFITS

- Ultimate performance in extreme riding - oil flows fast and stays strong, reducing internal engine friction
- Tested and proven to deliver exceptional acceleration at the touch of the throttle
- Fully synthetic 4-stroke motorcycle engine oil with Trizone Technology™ protection of engine, clutch and gears
- Complies with requirements of catalyst equipped engines.

POWER1 4T 10W-40

BECOMES POWER1 ULTIMATE 4T 10W-40 IN 2024

Part synthetic, advanced premium 4-stroke engine oil for high performance bikes.

Castrol POWER1 4T 10W-40 exceeds the requirements of API SJ, SH, SG, SF and SE and is thus suitable for service use in the majority of Japanese and European machines including those fitted with turbochargers.

FEATURES & BENEFITS

- Fast flowing Power Release formula reduces internal losses in engine
- Excellent wear control, particularly in cams
- Easy starting and stable idle while cold
- Race proven high temperature clutch slip control and minimal low temperature clutch drag for easier, smoother gear changes
- Enhanced clutch pack life even under arduous conditions like Drag Racing and Superbikes.

POWER1 A747

Castrol POWER1 A747 is a high performance castor/synthetic 2-stroke lubricant. It is designed primarily for use in water-cooled, motorcycle engines of very high specific power output, as well as high performance racing Go-Kart engines.

The product utilises a carefully balanced castor/synthetic base oil mix which has demonstrated excellent load bearing characteristics and resistance to piston scuffing.

Castrol POWER1 A747 is a race proven lubricant that demonstrates outstanding engine wear protection and cleanliness in competition applications.

FEATURES & BENEFITS

Castrol POWER1 A747 provides superior performance in many areas compared to most mineral based two stroke oils, namely:

- Excellent crankshaft lubrication
- Excellent piston lubrication
- Very low rate of piston ring wear
- Throttle slide lubrication during wet racing.

Pack Size	6x1L
Item Code	3420100
Barcode	9310084031397

CHAIN SPRAY O-R

REPLACED CHAIN OIL AEROSOL

High performance chain lubricant that provides overall protection and longer service life to motorcycle chains and sprockets.

Suitable for motorcycle chains and sprockets and suitable for standard O-Ring and X-Ring chains. It is also useful on spark plug threads and nut and bolt threads subject to high temperatures.

FEATURES & BENEFITS

- Outstanding lubrication and protection under extreme conditions
- Resistant to water wash-off
- Protection against corrosion and aggressive environments
- Reduced friction helping to maximise power transfer and reduce wear.

Pack Size	6x250G
Item Code	3377680
Barcode	9310084020384

FOAM AIR FILTER OIL

Specially formulated for applications to "wet type" foam air filters fitted to 4 and 2-stroke engines.

FEATURES & BENEFITS

- Provides excellent performance in preventing airborne dirt and abrasive particles from passing through the air intake system into the combustion chamber.

Pack Size	6x300G
Item Code	3357643
Barcode	9310084012839

Boating fluids

OUTBOARD 2T

Self-mixing fully tested and approved TC-W3™ standard 2-stroke outboard oil.

Recommended for all water cooled outboard motors, including Force, Mariner, Johnson, Evinrude, Mercury, Chrysler, Suzuki, Tohatsu and Yamaha. It is suitable for premixed fuel oil or for direct oil injection systems.

It can be used with fuel/oil ratios of up to 100/1 (as specified by the engine manufacturer).

FEATURES & BENEFITS

- Superb anti-wear properties to ensure excellent engine protection
- Exceptional overall engine cleanliness and reduced spark plug fouling
- Excellent corrosion and storage protection.

SPECIFICATION/TECHNICAL DATA

- Meets NMMA TC-W3

Pack Size	6x1L	3x4L
Item Code	3377726	3377729
Barcode	9310084020292	9310084020322

Garden fluids

CHAINSAW OIL

An adhesive lubricant suitable for all chainsaw types.

Recommended for saw chains and cutter bars of chainsaws with automatic oiling systems.

FEATURES & BENEFITS

- Anti-corrosive properties limit failure and repair costs
- Increased lubrication improves cutting speed and performance.

Pack Size	6x1L	3x4L	20L	205L	1000L
Item Code	3378045	3378044	3378042	3378043	3378041

GARDEN 2T

A 2-stroke engine oil recommended for 2-stroke lawnmowers, lawn edgers, chainsaws and stationary engines.

FEATURES & BENEFITS

- The formula is very clean burning. This means cleaner combustion chambers, exhaust ports and mufflers
- Good piston and cylinder lubrication
- Mixes rapidly with fuel, dyed blue for easy identification. With unleaded petrol, the fuel/oil mix turns a pale green colour.

SPECIFICATION/TECHNICAL DATA

GARDEN 4T 10W-30

Castrol Garden 4T 10W-30 is a modern engine oil for garden machinery with a formulation that ensures enhanced engine cleanliness and durability. Is suitable for four stroke gasoline engines in lawn care and garden equipment where the manufacturer recommends API SN or earlier specifications. It is also suitable for diesel engines requiring API CF lubricants or earlier.

FEATURES & BENEFITS

- Multigrade 10W-30 enables reliable engine start-up year round
- Fights deposits and maintains engine cleanliness
- Excellent protection against engine wear and corrosion
- Suitable for a wide range of garden equipment with 4-stroke gasoline or diesel engines requiring API SN/CF or earlier specification.

SPECIFICATION/TECHNICAL DATA

- API SN/CF

Pack Size	6x1L
Item Code	3421498

Cleaning products

BIOTRANS QB

High foaming biodegradable detergent for removing dirt, traffic haze, oil and grease from all vehicles.

May be used for washing boats and motorcycles.

FEATURES & BENEFITS

- Has quick-break properties to assist in waste water disposal via separator equipment
- Suits a multitude of applications which can reduce inventory of products on site
- Suitable for use in hard, soft and salt water environments
- Enables thorough cleaning of surfaces and can be foamed.

TECHNICAL DATA/DIRECTIONS FOR USE

- Suitable for manual or machine applications, including pressure cleaners

CARECLEAN LIME

Water based, heavy-duty hand cleaner with a pleasant lime fragrance developed to remove a range of soils and provide excellent skincare and conditioning.

Well suited to a range of industries where it is a very effective hand cleaner for the removal of a wide range of soils including grease, grime, soot, ink and many other contaminants.

Ideal for manufacturing, rural and handyman applications.

FEATURES & BENEFITS

- Contains optimum concentration of natural abrasive beads to gently massage the skin removing ingrained dirt and grease without being too harsh in removing the skin's natural oils
- Contains aloe vera to enhance soothing and conditioning of the skin
- Multi-purpose reduces the need for numerous hand cleaners.

TECHNICAL DATA/DIRECTIONS FOR USE

- Colour: green
- Apply approx. 5ml to hands that have not been pre-moistened and massage into skin
- Rinse off with cold or warm water

Pack Size	4x4L	3x5L	20L
Item Code	3334599	3410663	3410664
Barcode	9310084004582	9310084027109	9310084027116

The images shown are for illustration purposes only and may not be an exact representation of the product.

HAIR AND BODY WASH

High foaming shampoo for use in cleansing of skin and hair.

Suitable for use in industrial shower complexes where its special cleansing ingredients are effective on tough soils while its mildness ensures it is non-irritant to most skins.

FEATURES & BENEFITS

- Blend of gentle cleansing agents and conditioners contains a pleasant fragrance and leaves the skin and hair feeling soft and refreshed
- Highly concentrated, allowing economical use
- Fully biodegradable and therefore environmentally friendly
- Contains no harsh ingredients, minimising irritation when used on sensitive skin
- Effective in both hard and soft water.

TECHNICAL DATA/DIRECTIONS FOR USE

- After wetting, apply to skin and hair, working into a rich lather using hands, sponge or cloth

Pack Size	4x4 Dispenser	20L	200L	1000L
Item Code	3335046	4105283	4105103	4105476
Barcode	9310084008665	9310084524028	9310084524073	9310084501586

MINECLEAN

Multi-purpose, biodegradable, water based heavy duty detergent/degreaser.

Suitable for covering most cleaning requirements on a mine site, including workshop floors, pressure cleaning, light/heavy vehicle washing and degreasing.

Also suitable for janitorial tasks such as washroom floors/walls, painted/tiled surfaces, bench tops and vinyl/plastic surfaces.

FEATURES & BENEFITS

- Economical to use as can be diluted up to 80:1 dilution with water
- Suitable for use in various environments – in both fresh bore or salt water
- Versatile and can be used on most surfaces.

TECHNICAL DATA/DIRECTIONS FOR USE

- For vehicle cleaning, 1:1 to 4:1 for large equipment and 20:1 for trucks, cars, 4WDs
- For vehicle interiors, 20:1 to 40:1
- For floors and paths, 40:1 to 5:1 (dirty oil surfaces)
- For general surface cleaning, 10:1 to 80:1
- For high pressure cleaners/automatic floor cleaners, 50:1 heavy duty, 80:1 light duty

Pack Size	20L	200L	1000L
Item Code	4105432	4105386	4105447
Barcode	9310084500121	9310084500176	9310084501647

The images shown are for illustration purposes only and may not be an exact representation of the product.

MOP S

Effective oil and liquid absorbent based on a granular inert diatomaceous earth sourced in Australia.

Industry uses include absorption requirement in garages, workshops, tanneries, packaging, oil/paint stores, lift wells, mastic floors. Can also be used in pattern making and floor ash trays.

Domestic uses include pet trays, oil drip trays, organic gardens, snail deterrent, potting, laundry, garbage bin, cellars and aquariums.

FEATURES & BENEFITS

- Safe, hygienic, handy and has many applications
- Health and safety acceptable as non-flammable in itself
- Easy to transport as solid but light in weight
- Starts absorbing immediately for effective spill clean-up
- Excellent absorbency and will draw up approx. its own weight in oil.

TECHNICAL DATA/DIRECTIONS FOR USE

- Colour: whitish brown inert neutral and odourless granular product
- 30L bag will cover approx. 14sqm to a depth of 3mm
- Replace when saturation is reached – black colour where soaking up oil. Dark brown when acids, water and other liquids are spilt.

Pack Size	30L
Item Code	3343275
GTIN-13	9310084005633

ENGINE SHAMPOO

Modern driving creates combustion by-products that can build up in your oil. When these cake and accumulate they form layers of sludge that can harm engine performance, especially in the latest precision engines.

Castrol Engine Shampoo helps to maintain engine power and efficiency by dissolving away and flushing out sludge during the oil change process.

Castrol Engine Shampoo is recommended for use in automotive engines as part of routine oil changes.

FEATURES & BENEFITS

- This innovation - Castrol PCA - is so powerful it can even dissolve away sludge that has already formed in your engine
- Helps maintain engine power and efficiency by removing deposits from the surface of moving engine parts
- Designed as a parts-friendly formulation, will not attack engine seals and other parts in spite of powerful cleaning power
- Very simple to use: add Castrol Engine Shampoo to the engine, run at idle for ten minutes and then change the engine oil as usual.

TECHNICAL DATA/DIRECTIONS FOR USE

- Powerful Cleaning Agent "PCA" provides superior cleaning performance

Pack Size	6x300ML
Item code	3418104
Barcode	9310084030659

MULTICLEAN

Premium performance, high foaming biodegradable degreaser detergent which effectively removes dirt, oil and grease from hard surfaces.

Suitable for maintenance cleaning in the workshop, marine industry, factory, mining maintenance, office, food preparation and processing areas.

Can be used for all on and off-road vehicles and equipment.

FEATURES & BENEFITS

- A multifunctional product for use at various dilutions.

TECHNICAL DATA/DIRECTIONS FOR USE

- Colour – opaque, yellow thixotropic liquid
- pH approx. 11
- For degreasing engines/machinery, dilute 1:1 to 1:4 with water
- For vehicle/equipment washing, dilute 1:19 with water
- For concrete floors/steel surfaces, dilute 1:40 with water
- For pressure cleaning, dilute 1:30 to 1:80 with water
- For food industry, dilute 1:100 with water

Pack Size	20L	200L	1000L
Item Code	4105280	4105315	3354059
Barcode	9310084501517	9310084501524	9310084000034

MULTI-PURPOSE DEGREASER

For degreasing and cleaning ferrous and non-ferrous metals, glass, wood, ceramics and concrete.

Ideal for cleaning engines, machines, workshop floors and automotive components.

FEATURES & BENEFITS

- Formulated using biodegradable emulsifiers
- Convenient and ready to use, just spray on and wash off with low pressure water
- Washes off easily with water then separates so that excess oils and dirt can be retained in a grease trap
- One product for most degreasing operations
- No "oily" residue.

TECHNICAL DATA/DIRECTIONS FOR USE

- Can be used with brush, swab, spray or an immersion tank
- General purpose degreasing and cleaning – use neat

Pack Size	3x5L	20L
Item Code	3335472	4105342
Barcode	9310084007729	9310084533020

QB 100 DEGREASER

Quick-break degreaser allowing rapid separation of oil and grease residues from cleaning solutions in line with modern effluent disposal requirements.

May be used in a wide variety of degreasing applications on all metals, glass, wood, ceramics and concrete.

Ideal for cleaning engines, machinery, automotive components and workshop floors.

FEATURES & BENEFITS

- Easy and convenient to use as can be sprayed on and washed off with water
- Quick break properties for separation of grease and oil
- High flash point, reduced risk of fire.

TECHNICAL DATA/DIRECTIONS FOR USE

- Can be used with brush, swab, spray or in an immersion tank
- Apply on the surface, allow time for product to penetrate the soil (5-10 minutes) and rinse off with fresh water or wipe with a rag/paper wipe
- Residues should be collected in an effluent pit or sump

Pack Size	20L	205L
Item Code	4105347	4105281
Barcode	9310084538025	9310084538070

WONDERCLEAN

Multipurpose, water based cleaner suitable for removal of difficult stains from most surfaces including concrete, metal, timber, laminex, vinyl and painted surfaces.

May be used for degreasing and cleaning engines.

Also suitable for removing marks from car interiors, particularly vinyl and velour surfaces.

FEATURES & BENEFITS

- Highly concentrated, economical to use
- Suitable for use with hot and cold water; in fresh or salt water
- Versatile as can be used on most surfaces
- Non-flammable, so health and safety acceptable
- Pleasant fragrance, leaving the surface smelling fresh and clean
- Free rinsing – leaves no streaks or oily film
- Easy to apply – manual or equipment applications. Simply spray on and wipe off
- Multi-purpose product, reducing number of products required.

TECHNICAL DATA/DIRECTIONS FOR USE

- Non-flammable
- Water based
- Suitable for use in pressure cleaners
- Highly concentrated liquid; can be diluted up to 150:1 ratio with water

Pack Size	20L	200L
Item Code	4105319	4105256
Barcode	9310084562020	9310084562075

The images shown are for illustration purposes only and may not be an exact representation of the product.

TECHNICLEAN AS 62

Castrol Techniclean™ AS 62 is a fast drying, low aromatic solvent cleaner. It has excellent solvency power and is compatible with all metal substrates and most non-metal substrates.

Techniclean AS 62 has been developed specifically as an alternative to chlorinated solvent cleaners and traditional high aromatic-containing hydrocarbon solvent cleaners.

FEATURES & BENEFITS

- Excellent solvency power against animal, vegetable and mineral fats and oils and very low surface tension, allowing the fluid to penetrate into difficult to reach areas – improves parts cleanliness and reduces re-work
- Fast drying, residue-free finish – increases productivity and minimises scrap-rate
- Based on a solvent with low aromatic content – improves environment for workforce
- No waste water is produced and solvent can be recycled by distillation – highly effective and yet economical.

Pack Size	20L	205L
Item Code	3413976	3413975
Barcode	9310084029301	9310084029318

TECHNICLEAN GALVPACK PB

Castrol Techniclean™ Galvpack PB is a blend of detergent additives that exhibits excellent stability in hot alkaline solutions.

Techniclean Galvpack PB is designed to be used as a detergent package in combination with strong alkaline builders and acids in dip applications.

It improves the cleaning properties of alkaline soak tanks and pickling baths in a range of industries, including galvanising, plating and engine reconditioning.

FEATURES & BENEFITS

- Excellent wetting and cleaning of metal surfaces in hot caustic soak tanks, > 80 °C
- Excellent stability in hot alkaline solutions
- Stable in acid solutions where it also improves the performance of pickling baths.

Pack Size	200L	1000L
Item Code	3413462	3414121
Barcode	9310084028724	9310084029547

Diesel Exhaust fluids

DIESEL EXHAUST FLUID

ADBLUE

Castrol AdBlue® is a high quality AUS/32 Diesel Exhaust Fluid conforming to the ISO 22241 specification.

Made under license from Verband der Automobilindustrie e.V. (VDA).

TECHNICAL DATA/DIRECTIONS FOR USE

The ISO 22241 specification consists of five sections. Castrol AdBlue® conforms to all sections of ISO 22241 as outlined below.

ISO 22241-1:2019 Diesel engines -- NOx reduction agent AUS 32 --
Part 1: Quality requirements

ISO 22241-2:2019 Diesel engines -- NOx reduction agent AUS 32 --
Part 2: Test methods

ISO 22241-3:2017 Diesel engines -- NOx reduction agent AUS 32 --
Part 3: Handling, transportation, and storage

ISO 22241-4:2019 Diesel engines -- NOx reduction agent AUS 32 --
Part 4: Refilling interface

ISO 22241-5:2019 Diesel engines -- NOx reduction agent AUS 32 --
Part 5: Refilling interface for passenger cars

INSTRUCTIONS FOR USE

- Fill into the designated tank for DEF/AUS. Do not fill into diesel/ fuel tanks
- Once opened, the container should be consumed in full to avoid contamination and negative impact on product quality
- Avoid contamination with fuel or oil. Use a dedicated spout to pour Castrol AdBlue® into the tank
- Keep away from dust and dirt.

Low speed pre-ignition and new engine oil specification

Low speed pre-ignition phenomenon

Today's modern engines are designed to deliver higher levels of performance, improved fuel economy and emissions benefits than ever before. Common approaches being introduced are downsizing, turbocharging and gasoline direct injection engines.

These strategies place higher stress on the engine due to higher operating temperatures. At low speeds and high loads, the fuel-air mixture in the cylinder ignites early, resulting in a higher pressure than expected in the cylinder. This causes engine knock, reduced engine performance and in severe cases, may lead to engine damage such as broken spark plugs and cracked pistons. This phenomenon is called Low-Speed Pre-Ignition - LSPI which typically occurs when an engine is under high load at low rpm (i.e., driving slowly and then rapidly accelerating).

Contributed factors to LSPI

Unlike conventional knock, an LSPI event cannot be predicted and corrected by adjusting spark timing.

Research has pointed out that LSPI arises from interactions between lubricants, fuels, and engine design/operation. As such, mitigating pre-ignition involves altering the design of the engine or lubricant to help avoid this emerging issue.

In relation to engine lubrication, there are also a number of documented analysis where they look to understand the effects of key components in a modern lubricant to LSPI. Components that have a significant impact on LSPI have been categorised as: quencher (decrease LSPI activity), promoter (increase LSPI activity), and neutral (no change in LSPI activity) are summarised in below table.

NLGI Number	Appearance	Consistency Food Analog	Appearance
Detergent	Calcium Sodium	Magnesium	
Friction Modifier			Molybdenum
Antiwear			ZDDP
Vi Improver		✓	
Anti-oxidation			✓

New engine oil specification

In order to not only minimise the LSPI phenomenon but also provide better engine protection as well as oxidation stability and deposit control, the two latest oil specifications API SP and ILSAC GF-6 were introduced in May 2020.

There are five new engine tests introduced for API SP compared to API SN PLUS to ensure that engines requiring API SP capable engine oil are robust for the latest generation of engine hardware.

- Sequence IIIB - Measure viscosity control (resists thickening), oil oxidation resistance and engine deposit control
- Sequence IVB - This is a new engine test for engine wear
- Sequence VH - A new test for engine cleanliness and sludge
- Sequence IX LSPI - API SP requires slightly more stringent control of LSPI events. API SN and prior specifications do not have any testing for LSPI
- Sequence X - A new requirement for timing chain wear protection.

ILSAC GF-6 provides low-speed pre-ignition and timing chain wear protection while improving piston cleanliness and fuel economy. This performance standard includes two separate specifications: GF-6A which is backward-compatible with the existing ILSAC viscosity grades and GF-6B will be defined for 0W-16 viscosity grade oils only.

In ASPAC, Castrol have upgraded PCO portfolio include both EDGE, MAGNATEC and GTX range to meet the latest engine oil specification since beginning of 2022.

Please connect with your local marketing team for a further detail plan.

ACEA engine oil sequences for light duty engines.

What is ACEA?

ACEA is a European Automobile Constructors' Association that represents Europe's 16 major car, van, truck, and bus manufacturers. They are the European equivalent of the American Petroleum Institute (API).

The ACEA oil sequences define the minimum quality level for service fill engine oil. Service manuals often recommend ACEA as well as API and JASO specifications. If a manufacturer mandates an ACEA specification, using products without the required ACEA specification may provide inadequate engine protection, shorten the life of after treatment devices and void the manufacturer's warranty.

For lubricant marketers to claim ACEA specifications, they must submit a letter of conformance to ATIEL. Castrol is a proud member of ATIEL and a signatory to ATIEL's letter of conformance. You can check whether a lubricant marketer is a signatory at www.sail-europe.eu

ACEA classes

The ACEA defines the following engine oil classes,

ACEA A/B for gasoline and light duty diesel engines.

ACEA C for gasoline and light duty diesel engines with after treatment devices*

ACEA E for heavy diesel engines.

*After treatment devices include three-way catalytic converters, diesel particulate filters (DPF), gasoline particulate filters (GPF).

What is new for 2021?

2021 saw the introduction of new and updated light duty ACEA sequences to better serve changing engine technologies.

The new sequences focus on LSPI prevention, as well as turbocharger deposits, wear, and fuel economy. All existing sequences have been revised, either discontinued or updated.

Discontinued Categories – A3/B3, C1.

These can no longer be claimed after May 2023. ACEA A3/B4 can be used where ACEA A3/B3 was required. ACEA C1 has no direct replacement, however manufacturers such as Jaguar and Land Rover can continue with OEM or alternative specifications where required.

Introduced Categories – A7/B7, C6.

These categories are based on A5/B5 and C5 respectively. They offer higher performance by including tests for LSPI prevention, timing chain wear, turbocharger deposits and improved fuel economy.

Updated Categories – A3/B4, A5/B5, C2, C3, C4, C5

(all existing categories that have not been discontinued).

These have revised requirements for sludge, piston cleanliness, valve train wear and fuel economy.

How are ACEA categories different?

ACEA categories are governed by a set of parameters.

Key parameters are HTHS viscosity and SAPS. Lower HTHS viscosity provides better fuel economy, while lower SAPS provides longer life for after treatment devices. See Figure 1. The terms low, medium, and high SAPS, refer to the ACEA limits on certain additives that can be used to formulate an oil.

HTHS	SAPS Level		
	Low	Medium	High
Low		C5 C6	
Mid		C2	A5/B5 A7/B7
High	C4	C3	A3/B4

Figure 1

APS – Sulphated Ash Phosphorus and Sulfur.

HTHS – High Temperature High Shear.

C6 and A7/B7 include LSPI protection.

A3/B4 does not have a fuel economy requirement.

Combined performance claims

Multiple ACEA categories can be claimed for the same lubricant formulation where all the associated requirements are met.

Certain combined claims are technically impossible due to mutually exclusive requirements. One such example is ACEA C3 (SAPS < 0.8) cannot be claimed with A3/B4 (SAPS >1.0).

Where both OEM approval and ACEA performance are specified, it is crucial both claims are met. For example, Castrol Magnatec Stop Start 5w-30 A5 is approved against Ford WSS-M2C913D. This specification is based on ACEA A5/B5 with the addition of Ford specific requirements for fuel economy and timing chain wear.

The importance of industry and OEM relationships

Castrol works closely with several European OEMs, including Renault, Jaguar, Land Rover, and Ford, to develop advanced lubricants that meet all the requirements of each OEM.

This demonstrates Castrol's ongoing commitment to providing high quality lubricants that have been developed through key industry and OEM relationships.

MAGNATEC 5W-30 replacing MAGNATEC Professional 10W-30

Castrol MAGNATEC 5W-30 is a part synthetic engine oil suitable for use in a wide range of petrol engines where the manufacturer recommends an API SP or ILSAC GF-6 specification 5W-30 lubricant.

The latest industry specifications of API SP and ILSAC GF-6 not only offer protection for the very latest engines but are fully backwards compatible, as such MAGNATEC 5W-30 can be used where a 5W-30 or 10W-30 oil meeting any earlier petrol API or ILSAC specification is recommended.

Q. What benefit will MAGNATEC 5W-30 bring?

Future Proofing your Business

Castrol MAGNATEC 5W-30 uses the latest technology additives system to mitigate Low Speed Pre-Ignition which can occur in modern spark ignited internal combustion engines utilising downsizing, Gasoline Particulate Filters (GDI) and Turbocharged engines.

Reduced complexity

While protecting modern engines, Castrol MAGNATEC 5W-30 is also designed to protect legacy engines requiring the earlier ILSAC Viscosity grades providing a one oil solution for a wide range of petrol engines.

Q. Can I replace an SAE 10W-30 GF-5 with an SAE 5W-30 engine oil meeting GF-6?

YES, the operating temperature viscosity of MAGNATEC 5W-30 is equivalent to that of MAGNATEC PROFESSIONAL 10W-30 again ensuring full backwards compatibility.

Performance benefits from API SP & ILSAC GF-6

The base oil properties, Viscosity Index and high quality additives deliver improved cold start performance, low oil consumption and excellent stay-in grade performance as well as;

- Improved fuel economy and fuel economy retention
- Oxidation stability
- Deposit control
- Improved engine cleanliness.

The table below shows a comparison of the physical properties and specifications associated with each grade.

	Magnatec 5W-30	Magnatec Professional 10W-30
API	SP	SN
ILSAC	GF-6	GF-5
NOACK	11	11
Viscosity at 100 °C	10.1	10.6
Viscosity at 40 °C	60	76

NOACK Volatility measures the evaporative loss of an engine oil. Evaporative loss can lead to oil consumption and oil thickening robbing fuel efficiency.

Multivehicle automatic transmission fluids.

Technology Development

Step type automatic transmissions (AT's) have undergone significant development with increasing gear ratios and longer service intervals, high performance friction materials and complex hydraulic shift systems. It is no surprise the Automatic Transmission Fluids (ATF's) have improved significantly to meet these demands and with reducing oil viscosity to assist with improved fuel economy.

CASTROL TRANSMAX ATF DEXRON VI-MERCON LV MULTIVEHICLE is one such fluid and due to these performance improvements, it is recommended for use in a wide variety of applications.

JASO M315:2015

TRANSMAX ATF DEXRON VI-MERCON LV MULTIVEHICLE exceeds the JASO 1A-LV performance requirements and is recommended for use against most Japanese OEM requirements.

There are many OEM first fill fluids and specifications required by Japanese OEM's. Each first fill fluid having subtle performance differences to deliver the desired outcome and performance for the OEM in question. However, fluids meeting JASO M315:2015 1A or 1A LV, are recognized by Japanese OEM's as acceptable service fill alternatives.

JASO M315:2015	1A	1A
Viscosity @100°C	≥6.5cSt	≥6.5cSt

Table 1: Viscosity requirements for JASO 1A & 1A LV

Improved wear control

TRANSMAX ATF DEXRON VI-MERCON LV MULTIVEHICLE exceeds the requirements of GM's DEXRON VI specification with approximately 15% increase in the wear control compared to the superseded DEXRON III-H, a higher viscosity fluid.

GM DEXRON WEAR	DEXRON IIIH	DEXRON VI
Sprag wear test	<60 mg wear	<50 mg wear
Viscosity @100°C	7.2cSt 6.4cSt Max	

Table 2: GM wear tests

TRANSMAX ATF DEXRON VI-MERCON LV MULTIVEHICLE exceeds the requirements of FORD MERCON LV specification providing improved 4 ball wear results over the FORD MERCON V specification.

FORD WEAR TESTS	MERCON V	MERCON LV
Four Ball Wear (wear scar)	0.61mm Max	0.5mm Max
Viscosity @100°C	6.8cSt min	5.5-6.2cSt

Table 3: Ford Wear Test

Improved friction durability

TRANSMAX ATF DEXRON VI-MERCON LV MULTIVEHICLE has significantly improved friction durability over typical DEXRON III oils delivering 2 time longer smooth shifts and anti-shudder control.

Smooth Shift Test (LVFA)

Backwards compatibility

GM recommend the use DEXRON VI approved oils in vehicles requiring earlier fluids from MY 2006. Note GM do not recommend DEXRON VI in manual transmissions where earlier DEXRON specifications were required.

Further confirmation of the back serviceability of TRANSMAX ATF DEXRON VI-MERCON LV MULTIVEHICLE is shown by Ford recommending the use of MERCON LV fluids where FORD MERCON approved fluids were recommended from 2003 MY vehicles - transmission models, 5R110 & 4F27E.

Guidelines for use

6 RATIOS OR GREATER
TRANSMAX ATF DEXRON VI-MERCON LV MULTIVEHICLE in
5 RATIOS AND LOWER

Understanding and selection of driveline fluid.

Driveline fluid selection

Driveline fluids, like engine oils, are approved to industry standards such as API, SAE J2360 and MT-1 performance levels. These leading industry bodies and certifications determine the minimum requirements for fluids used in the majority of vehicles.

API Service Designations in Current Use

API GL-4: Lubricants intended for axles with spiral bevel gears operating under moderate to severe conditions of speed and load, or axles with hypoid gears operating under moderate conditions of speed and load.

API GL-5: Lubricants intended for gears, particularly hypoid gears, in axles operating under various combinations of high-speed/shock load and low-speed/high-torque conditions.

API MT-1: Lubricants intended for non-synchronised manual transmissions used in buses and heavy-duty trucks.

SAE J2360: Lubricants satisfy and exceed the requirements of API GL-5 and contains performance requirements that exceed those of API Category GL-5. For example, SAE J2360 has a requirement for elastomer compatibility and gear cleanliness after oxidation, that are not contained in API GL-5.

Why do oem defines their own standards?

OEMs are increasingly working with lubricant companies to define their own standards for lubricant performance. These fluids are tailored specifically for the components they manufacture. These standards ensure the lubricant delivers superior performance as they are developed for the engine or component manufactured by the OEM. Castrol has partnerships with major OEMs. This provides Castrol with an opportunity to begin developing lubricants years in advance of the release of a component when it exists only as a drawing.

This approach gives Castrol's Lubrication Engineers a unique insight into the tribology and specific requirements of the components so they can deliver a product that maximises performance and extends component life. This is Castrol Co-Engineering! To secure lubricant approvals often requires lengthy field trials that can last for up to five years.

Why its important to select right fluid?

With the continuous evolution of cars' technology over the past years transmissions have become more complex, demanding more technologically advanced fluids to ensure vehicle reliability.

Getting the right oil for your vehicle is key to ensuring drivelines operate as they are designed to and get the maximum protection under demanding conditions. Using the right oil Castrol, with over 100 years of experience in developing transmission and axle fluids and being the choice of many leading car and transmissions manufacturers for factory-fill products, offers a complete range of products which can meet your car's requirements.

Automatic transmission reveal.

Components such as these can be protected using an OEM approved driveline lubricant.

Fill for life fluids

OEMs are working to improve fuel efficiency and provide quality drivability. This has led to the development of OEM service fill specifications for driveline products. As competition for car sales increases, "filled for life" becomes a strategy to reduce the cost of ownership of a vehicle and improve its environmental impact by removing the need to change the oil, filters and screens in manual and automatic transmissions and in differentials and cooling systems. Typically, these filled for life fluids are extremely high quality synthetic oils or long life coolants with the relevant OEM approval.

Castrol Transmax, Smooth Drive Technology

Whether a car is automatic or manual, Castrol TRANSMAX range has the right transmission fluid for the vehicle, providing enhanced protection to all moving parts which enables longer transmission life.

The advanced Castrol TRANSMAX range features Smooth Drive Technology™ with active control molecules that automatically adjust their friction level with changing pressures and speed. This ensures the transmission is constantly served the right level of friction at any given moment – protecting the parts and delivering a smoother drive for longer. you are providing the correct recommendation.

Hybrid/electric vehicles and Castrol products

What is hybrid, EV & PHEV technology?

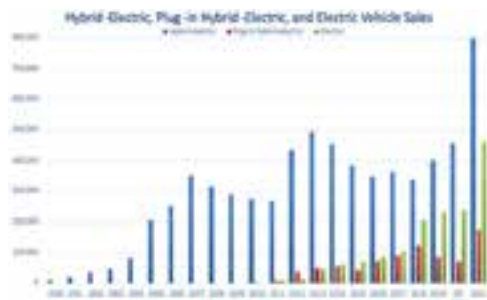

Hybrid electric vehicles are powered by an internal combustion engine and one or more electric motors, which use energy stored in batteries. A hybrid electric vehicle cannot be plugged in to charge the battery. Instead, the battery is charged through regenerative braking and by the internal combustion engine.

However, all-electric vehicles, also referred to as battery electric vehicles (BEVs), have an electric motor instead of an internal combustion engine. The vehicle uses a large traction battery pack to power the electric motor and must be plugged in to a wall outlet or charging equipment, also called electric vehicle supply equipment (EVSE).

Plug-in hybrid electric vehicles (PHEVs) use batteries to power an electric motor and another fuel, such as petrol, to power an internal combustion engine (ICE). PHEV batteries can be charged using a wall outlet or charging equipment, by the ICE, or through regenerative braking. The vehicle typically runs on electric power until the battery is depleted, and then the car automatically switches over to use the ICE.

Hybrid and EV demand

Although hybrid electric vehicles were first on the market, electric vehicles have quickly gained popularity.

Ref: www.electrek.co

Over 15.5 million electric cars were on the road in 2021, a tripling in just three years

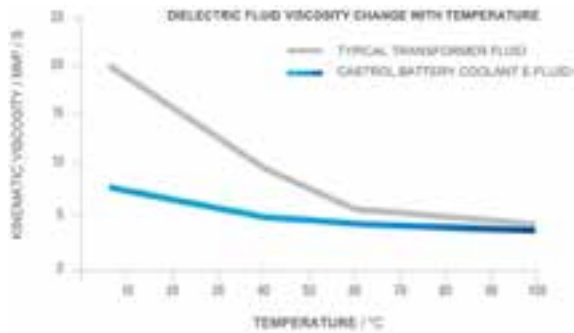

Ref: IEA Analysis, complemented by ACEA, EV Volumes, MarketLine

Castrol e-Fluids

Castrol is partnering with major manufacturers to ensure its lubricants deliver what drivers want, to go further on a single charge, enable longer life of transmission and driveline components, and ensure long-lasting battery health.

Battery Coolant e-Fluid has advanced properties to enable improved battery thermal management performance to keep batteries cooler, even in extreme conditions.

Castrol Dielectric Battery Coolant e-Fluid has a lower viscosity than conventional dielectric coolants, increasing cooling efficiency and protecting batteries against electrical breakdown.

e-Transmission Fluid

The demand on e-transmissions is more severe than conventional transmissions, with maximum torque delivered at low speeds and the increasing integration of electric motors into the transmission.

Wet Plus Transmission e-Fluid's

Specially developed technology, with its optimised friction levels for synchronizer systems and clutches.

Wet Transmission e-Fluid's

Low viscosity formulation is specifically developed to deliver low electrical conductivity, enhanced system protection and helps the e-motor run cooler enabling it to operate at high efficiency.

Dry Transmission e-Fluid's

Help overcome the challenges the drivetrain system faces by providing enhanced protection, reduce viscosity loss and fast release of entrained air.

Grease e-Fluids have a vital role to play in overcoming the challenges that electric vehicle components face during everyday drive.

Understanding Coolant technologies.

What is Coolant?

The primary job of an engine coolant is to provide cooling by absorbing generated heat in engine components.

Coolants are composed of ethylene glycol (sometimes propylene glycol), purified water, performance additives and coloring dyes. Works of an engine can generate extreme heat which can catastrophic failure if it isn't equipped with an efficient heat transfer mechanism. Heat transfer is achieved by an advanced cooling system continuously circulating coolant around the engine's hot zones, absorbing heat and discharging it to the atmosphere via the radiator.

Coolants encounter very high surface temperatures are circulated at high velocity and are exposed to a variety of different types of metal and non-metal components. Hence there is great potential for chemical reactions and physical damage.

The second critical function of a coolant is to protect hot metal surfaces and other components from corrosion and degradation. In order to prevent engine damage and enable swift start-up, coolant must resist freezing in sub-zero temperatures, and boiling in summer heat. Two types of glycols are usually applied for engine coolants where both share similar cooling properties. Propylene glycol is categorized to be less toxic compare with ethylene glycol. While the later has better heat transfer due to its lower specific heat.

Concentrate or premix?

Coolants are sold in premixed, ready-to-use form or concentrate.

Concentrated coolants should never be used undiluted as heat transfer since it will be severely compromised. Water quality is very important for corrosion protection. Only de-ionized or soft tap water should be mixed with a coolant concentrate.

Color is not an indicator of coolant performance

Early antifreeze products were often dyed green to aid leak detection.

Other colors now differentiate new technology coolant from the "conventional green" antifreeze. The color may be representative of an approved or OEM genuine product or simply a coolant manufacturer's choice. There is no standardized color system for coolants. Never select a coolant based on its color alone.

Types of Coolant

Coolants are generally categorized by their additive technology and level of approval to OEM and other performance specifications.

There are three broad classes of engine coolant technology:

1. Conventional/Traditional - based on older technology and less expensive inorganic additives. Relatively short life due to depletion of the additives and limited stability and protection at high temperature e.g. Castrol PREMIUM COOL PLUS.

2. OAT - based on fully organic additives with very low depletion rate and deliver long service life. Very stable and offers superior corrosion protection at high temperatures and compatibility with all cooling system materials e.g. Castrol RADICOOOL SF.
3. Hybrid OAT - combination of OAT type and selected inorganic additives that provide additional protection for certain component metallurgies under severe conditions. Several OEM approvals are restricted to hybrid-OAT-type technology e.g. Castrol RADICOOOL NF and Castrol RADICOOOL Si-OAT.

The risk of getting it wrong

Cooling system problems are one of the leading contributors of engine failure, a victim of a "set and forget" perception.

Proper coolant selection and maintenance are critical to trouble-free vehicle operation. A faulty cooling system may prevent effective warm-up of the engine, leading to poor lubrication and poor combustion control.

Minor cooling system corrosion generally becomes a major problem if left untreated. Problems can sometimes arise when different coolants are mixed-together. This is due to certain mineral-type additives being incompatible with each other if concentrations become unbalanced, extreme cases causing formation of solid deposits and cooling system blockage. Modern OAT type coolants tend to be much more tolerant of mixing with each other, nevertheless it is safe practice to avoid mixing different coolants together, and when replacing coolant to always fully drain and flush out the cooling system first.

Latest approved Coolant Technology

Industry standards define basic coolant performance. Most vehicle manufacturers add additional set of requirements onto the industry standards to define the higher performing coolants tailored to their engines and to enable extended warranty protection. To qualify a coolant for an approval, manufacturers must submit a sample for rigorous lab, engine and fleet tests designed by the OEM. This can take years to complete and is done at the coolant manufacturer's expense. If it run successfully, the product then determined to fulfil all the performance and warranty requirements of the manufacturer and earns a formal OEM approval. Only advanced coolants will pass these tests. Castrol Radicool Si-OAT is one such example, carrying formal approval from MAN, Mercedes Benz, Renault and Volvo. Coolants which only claim to "meet the requirements" of an OEM standard have not passed this comprehensive testing and qualification program. This is a much weaker indicator of performance, based on the marketer's own judgement.

Understanding and selection of right grease.

What is grease and the difference compared to oil?

Grease is formed by emulsifying liquid lubricant in a thickening agent like soap. The liquid lubricant in the grease generally is mineral oil or synthetic oil.

The key difference between oil and grease is the addition of thickening agent, typically a soap in grease. Generally, in room temperature and pressure, oil is in liquid form while grease would be in solid or semi-solid form.

Grease exhibits shear-thinning or pseudo-plastic fluid characteristic, which means that the viscosity of the fluid is reduced under shear. Once adequate force applied to shear the grease is achieved, the viscosity drops and approaches that of the base lubricant use in the formation of the grease.

Soap is the most common thickener or emulsifying agent for grease. The choice of the soap plays important roles in the performance of the grease like the operating temperature, water resistance, and chemical stability. Similarly, like liquid lubricants, grease is added with specific additives to improve the performance.

How to select a suitable grease

Like liquid lubricants, greases also are available in various grades and forms. In grease, the most important criterion for selection is the NLGI grade.

NLGI grade is the measure of the consistency or relative hardness of a grease used for lubrication, as specified by the standard classification of lubricating grease established by the National Lubricating Grease Institute (NLGI). The below table shows the NLGI number and compares each grade with everyday products of similar consistency.

NLGI Number	Appearance	Consistency Food Analog
000	Fluid	Cooking oil
00	Semi-fluid	Apple sauce
0	Very soft	Brown mustard
1	Soft	Tomato paste
2	"Normal" grease	Peanut butter
3	Firm	Vegetable shortening
4	Very firm	Frozen yoghurt
5	Hard	Smooth paté

The most common grease grade in automotive and industrial application is NLGI 2. This is followed by NLGI 1 and NLGI 3 grade grease. Other NLGI grades grease are usually required in other special application.

After selecting the right NLGI grade, the next evaluation is viscosity of the base oil in the grease. The base oil viscosity is measured in centistokes (cSt) at 40°C. Following rule of thumb, the higher the bearing/ component speed, the lower the base oil viscosity required. Thicker base oils are used in slower moving, heavily loaded applications.

Greases are usually formulated using mineral grade base oil. For grease formulated with synthetic base oil, it would enable the grease to reach higher or lower operating temperatures as well as wider operating temperature range compared to mineral base grease. In addition, synthetic base oil grease is used in application where extended relubrication intervals are required.

To improve performance, greases are improved by using additives. Example of additives are oxidation and rust inhibitors, extreme pressure additives, antiwear and friction-reducing additives.

The most widely used soap are lithium and calcium. Grease with lithium is preferred in general application as it has high dropping point and stable when carrying high load. Calcium grease is preferred for marine application due to its excellent water resistivity.

Castrol's specially formulated range of high-performance greases provide outstanding protection in all operating conditions and applications. We have developed some of the most advanced and high performing greases in the world, including for the International Space Station and the Mars curiosity rover.

The Technical team at Castrol have the experience and knowledge to help you make the most optimum choice on grease selection.

Understanding hydraulic oil specification

Hydraulic fluid requirements.

Nowadays, hydraulic fluids face challenging requirements and standards through equipment manufacturers and customers applications. Several applications will need specific characteristic to meet the standard of the industry, OEM, and regulatory requirements.

Classification of hydraulic fluid

There are several classifications which defines hydraulic fluid for hydrostatic applications:

- ISO 6743/4 or DIN 51524/3 – applied to mineral based fluid, biodegradable fluid, and fire-resistant hydraulic fluid
- ISO 12922 – specifically applied to fire-resistant hydraulic fluid
- ISO 15380 – specification for environmentally friendly hydraulic fluids
- OEM requirements

German OEMs usually also mention DIN 51524/3 standard which has slightly different specification from ISO 6743/4.

- DIN HL: Mineral oil with anti-rust and oxidation additive
- DIN HLP: HL oils with improved anti-wear properties
- DIN HVLP: HLP oils with improved temperature-viscosity behavior
- DIN HLPD: HLP oils with additives to improve detergency and dispersion capacity.

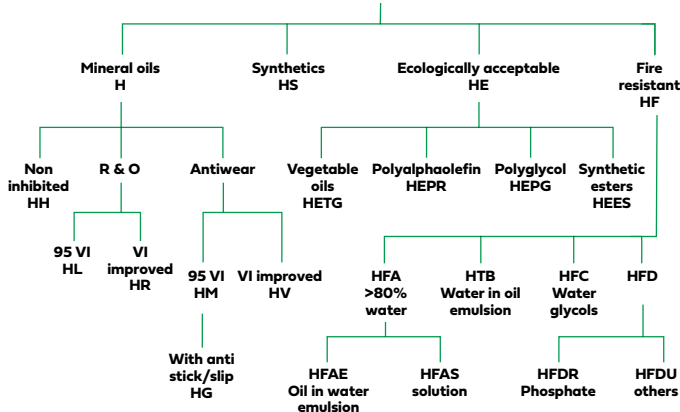

Environmentally friendly hydraulic fluids – ISO 15380

- DIN HETG: triglycerides (vegetable not soluble in water)
- DIN HEES: synthetic ester non-water soluble
- DIN HEPG: polyglycols types soluble in water
- DIN HEPR: polyalphaolefins and related hydrocarbon products.

Fire resistant hydraulic fluids – ISO 12922

- ISO HFAE: oil in water emulsions, mineral or synthetic ester (> 80% water content)
- ISO HFAS: mineral oil free, aqueous synthetic chemical solution (> 80% solution)
- ISO HFB: water in oil emulsions, mineral content >40%
- ISO HFC: water glycol solution, water content >35%
- ISO HFDR: water-free synthetic fluids consist of phosphate esters (not soluble in water)
- ISO HFDS: chlorinated hydrocarbons
- ISO HFDT: mixture HFDU / HFDT
- ISO HFDU: water-free synthetic fluids other than phosphate esters

Hydraulic Fluids - ISO 6743/4

Mineral oil based hydraulic fluids – ISO 6743/4

- ISO-L-HH: Mineral lubricants without corrosion inhibitors
- ISO-L-HL: HH lubricants with anti-rust and oxidation additive
- ISO-L-HM: HL lubricants with anti-wear additive
- ISO-L-HR: HL lubricants with a high VI ISO-L-HV HM lubricants with a high VI
- ISO-L-HG: HM lubricants with shock resistant features
- ISO-L-HS: Synthetic liquids

Heat transfer fluid and its applications.

Heat transfer system

A typical heat transfer system has 4 main components as below figure.

Figure 1: A typical design of heat transfer system

The circulation pump (1) pushes the heat transfer oil through an insulated piping to the heater (2) and to the process equipment (3). The expansion tank (4) on the system allows for the expansion and contraction of the hot oil as it heats up and cools down. Most heat transfer oil expand by up to 25% when heated to the maximum recommended bulk temperature. The tank will be $\frac{1}{4}$ full at ambient temperature and $\frac{3}{4}$ full at system's normal operating temperature. The expansion tank should be installed at the highest point in the system and connected to the suction side of the pump.

Heat transfer fluid application

Requirement of heat transfer fluid

The temperature of the heat transfer oil is raised in the heater by (gas, oil, coal, firewood, etc). Therefore, heat transfer oil must have properties as follows to adapt the hot working conditions, carry the heat, & protect the systems – the pumps, valves, pipe, equipment, etc.

1. High thermal stability
2. High heat capacity & transfer properties
3. High thermal conductivity
4. Low viscosity at operating temperature & pressure
5. Low corrosivity towards system materials
6. Low volatility
7. Low toxicity
8. Available economically.

Deterioration of heat transfer oil

The service life and heat transfer efficiency of an oil are significantly affected by thermal cracking, oxidation, and contamination.

Therefore, to minimise the influence of the above processes on the heat transfer fluid, please note as following.

- Make sure that the oil passes through the heat exchanger at the correct design speed, arrange the location of the heater appropriately, etc. to avoid local overheating.
- Heat the fluid slowly, do not increase oil temperature too quickly.
- Do not turn off the system suddenly.
- Keep the oil temperature on the expansion tank no more than 60oC. Minimize the direct contact of hot oil with the air.
- Keep fluid clean by minimizing contamination into the system. For new system, clean the heat transfer system, remove contamination such as debris, dirt, welding slag... Do not test system pressure by water.

important notes while using heat transfer fluid

Before filling process

- Check the oil pipeline system, fix the leak points in the system.
- Check the expansion tank: The expansion tank volume must be large enough to hold the oil when the system is working, the expansion tank must be set high enough.
- Pump and heat transfer oil supply system must be suitable, ensure the flow rate, avoid causing local overheating.
- Arrange a backup electric power (generator) and backup pump in case the mains electric power failure causes the pump to stop working suddenly.

Figure 2: Duo pumps to prevent the system turn off suddenly.

During filing process

- Check the positions of vents, exhaust, connections, electrical cables, connection bolts...
- Open the vent valves.
- Fill in the oil into the tank through the oil pump system at the lowest point to minimize gas entering the system. Stop filling when expansion tank is about 25% full.

Monitoring heat transfer fluid condition

The fluid should be tested according to 5 below parameters, at least twice per year.

1. Kinematic viscosity
2. Flash point
3. Total acid number
4. Carbon residue
5. Water by Karl Fischer.

Troubleshooting of water-soluble cutting fluids.

Water-soluble cutting fluids

Water-soluble cutting fluid are used by diluting the concentrate with water to a proper concentration.

Therefore, the diluent solution of water-soluble cutting fluid (hereinafter referred to as "coolant") has almost no risk of fire compared to water-insoluble cutting fluid and is often used in production sites.

On the other hand, compared to neat cutting oil that can be used almost on top-up, water-soluble cutting fluids change their concentration over time, so it is necessary to monitor the coolant condition and top-up the new coolant. If this coolant management is not properly implemented, the coolant will be prone to degradation, which will have a negative impact on productivity.

Therefore, here we will explain troubleshooting for water-soluble cutting fluids whose coolant condition tends to change over time.

Contamination

Since cutting fluids are used in open systems, they are mixed with various substances as follows.

These contaminants often lead to coolant troubles, it may be possible to prevent problems by knowing in advance what substances will be mixed into the coolant.

- Tramp oils: slideway oils, hydraulic fluids, front-end oils (cutting fluid, rust preventive, cleaner, forging oils, etc.)
- Leaching from chips (magnesium, zinc, copper, iron, etc.)
- Powders: barrel abrasive (calcium, etc.), shot blasting (zinc, etc.), surface treatment (bonderite treatment)
- Dirt: washing water used for floor cleaning, etc.

Color is not an indicator of performance

Coolant-related troubles include those listed below.

Other colors now differentiate new technology coolant from the "conventional green" antifreeze. The color may be representative of an approved or OEM genuine product or simply a coolant manufacturer's choice. There is no standardised color system for coolants. Never select a coolant based on its color alone.

Types of problems

Coolants are generally categorized by their additive technology and level of approval to OEM and other performance specifications.

If these troubles occur immediately after the start of coolant use, we believe that it is necessary to review the oil agent.

- Foaming
- Rust

- Scum (floating substances)
- Deposits in workpieces and machines, stickiness
- Workpiece discoloration (aluminum discoloration, oil stains on steel)
- Clogging of filters and piping
- Emulsion separation and gelation
- Coolant discoloration
- Damage to rubber and plastic
- Mist and oil smoke
- Odor (putrid odor, component odor)
- Increased wastewater treatment load
- Rough hands, dermatitis
- Increase in oil usage.

What information needs to be collected

If coolant-related trouble occurs at your customer site, the following information will lead to the resolution of the problem promptly.

In other words, if you always grasp the following information, it will lead to trouble prevention and better product selection.

In addition, if there is coolant that is not causing problems on similar processing machines, it will help to investigate the cause of the problem by comparing it with the coolant of the trouble machine.

- Coolant condition: concentration, pH, bacteria, etc.
- Process type: drilling, tapping, etc.
- Workpiece: cylinder block, cylinder head, etc.
- Workpiece material: aluminum, steel, cast iron (the distinction between FC or FCD is important), etc.
- Previous process: water soluble or neat oil, anti-rust, barrel polishing, etc.
- Diluted water quality (hardness, chlorine ions, etc.)
- Others: new machine (with anti-rust oil and grease),
- Lube oil leaks.

Tank-side additives

The use of tank-side additives is an effective way to solve coolant troubles, but there are a few things to be aware of.

For one thing, the concentration of ingredients is high, so it is necessary to pay particular attention to the human body when handling. On the other hand, if you make a mistake in selection or the amount of addition, the trouble may not be solved or another trouble may occur.

Summary

Summarising the troubleshooting of water-soluble cutting fluids:

- Find out when trouble occurs and whether the coolant condition changes, have the customer monitor the coolant.
- Collect information related to coolant and production processes, to grasp the cause of the problem, and
- Take corrective action.

Lube storage and handling.

Why is the storage and handling of lubricants important?

The implementation of good lubricant storage and handling practices can help deliver productivity, safety, and efficiency benefits for any operation. These practices ensure that your lubricants have not been compromised so they properly lubricate equipment to keep them running with minimal downtime whilst also helping to reduce waste.

The quality of your lubricant has a major impact on the life of equipment & subsequent cost of maintenance...

Source: FluidDefense systems

Here are some key points that should be considered when storing and handling lubricants:

Lubricants can become contaminated while in storage

A lubricants quality doesn't only change when in service, but also in storage. This is caused by exposure to dust, dirt, moisture, and other particles because of poor practice. In addition, long term exposure to adverse conditions such as high temperatures can affect a lubricants quality. It's imperative that they are stored in dedicated storage areas.

Lubricants should be stored indoors

Indoor storage is always preferable however not always possible. If outside storage is the only option, store drums horizontally. Alternatively used drum covers which are an inexpensive option.

Use correct dispensing procedure equipment

Lubricants are most likely to be contaminated during dispensing. Good dispensing practices must be implemented to ensure cleanliness and minimise contamination from dust and other contaminants.

Also utilise Oilsafe dispensing containers when dispensing small quantities.

At Castrol we can help design a best-in-class program

At Castrol we have a nationwide technical team with over 100 years of combined technical experience. One of our trained technical advisors can visit your site to conduct a thorough lubricants review. This will consider current practices, potential product rationalisation and review current infrastructure in place.

The benefits of proper storage and handling practices speak for themselves

The advantages of a best-in-class storage and handling program speak for themselves.
