

CorrosionX XD

Extended Duty

Product Description

CorrosionX Extended Duty combines the best of CorrosionX and CorrosionX Heavy Duty. Still a fast penetrant and thinly applied, it resists displacement or removal by splash or spray. Superb long life lubricant and rust stopper. Contains no wax, tar or silicone. Will not dry, harden or crack under stress. CorrosionX Extended Duty penetrates existing rust and corrosion, displaces moisture and shuts down electrolysis. It leaves a non-hardening, resilient coating that provides maximum protection against moisture intrusion.

Unique performance

CorrosionX XD is not flammable. Applicable over wet or already rusty surfaces. Extremely resistant against Sulphur, Methane and salt. XD has unlimited shelf life. It does not dry or go sticky. It does not pick up dirt. Superb lubrication factor of 0,4, some 3 times better than engine oil.

Safe to 25.000 Volt. Food safe, not food grade.

Protects and penetrates even into rusty hydraulic fittings, bolts, hinges, locks, chain drives and winch cables. HD does not go sticky or dry. Used on i.e. chain and sprockets it will not need to be cleaned off, but can simply be topped up with new product.

Application Suggestion

Marine:

Voids, anchor lockers, beltings, frame work , steel cables, exposed hydraulics, levers and linkages. Chain drives and cable hoists.

Long Term Storage, Taps and Hinges.Latches, Locks, Outdrives

Automotive, Truck & RV:

Forklift Chains, Container Doors and Locks, Roller gates

Battery Terminals, Electrical Connectors, Limiter Switches, Solenoids, Hydraulic hose swages. Work Shop Tools and Tools used on Site.

Industrial & Agricultural:

Long-Term Parts Storage, Rollers, Conveyors, Fittings, Implement Storage, Hinges, Cables, Locks and Locking Mechanisms, Livestock Trailers

Direction of use

Apply CorrosionX Extended Duty to metal surfaces (spray or brush on). For extensive applications, use a CorrosionX Handi-Spray System, available from CCNZ.

REMOVAL: Easily removed with a good degreaser or, for larger surfaces, use a steam cleaner fortified with U.S. Corrosion Technologies' Xtreme Clean™ available from CCNZ.

Safety brief / precautions

Non flammable, safe to 25.000 volt and an extremely low VOC of 7%. Hardly any smell, safe to use in confined spaces. Unlimited shelf life, will never dry or harden, so make sure to clean up the extremely slippery spills on floors, steps and ladders ! For full safety briefing see SDS sheet.
