

## PRODUCT OF THE MONTH

### CRC'S SMART WASHER

As a leading distributor, we strive to maintain a light carbon footprint. We also support a healthy environment by helping our customers reduce their impact. Where appropriate, we advise customers on energy savings in their operations and promote product alternatives that are bio-based, non-toxic and / or made from recycled content.

With that being said, our recommendation for the month of April is CRC's SmartWasher® Bioremediating Parts Washing System - which is both self-cleaning and environmentally friendly.

The pH neutral cleaner called Ozzyjuice is used to effectively clean parts, removing grease and grime while the naturally occurring process of bioremediation is used to turn those potentially hazardous contaminants into a harmless by-product of carbon dioxide and water. CRC'S SmartWasher® is super effective, even on the toughest carbon, grease, gunk and oils.
